About This Document

This document contains specification information of your projector and optional accessories such as external devices and mounts. See your projector's User's Guide for more details.

Projector Specifications

This projector projects a laser display.

Specifications

Item		EB-L255F/EB-L250F/EB-L200F	EB-L200W	EB-L200X
Projection system		RGB liquid crystal shutter		
LCD panel	Size (diagonal)	0.62"	0.59"	0.63"
	Display method	Poly-silicon TFT active matrix		
	Pixel number	2,073,600 dots ^{*1} FWXGA (W1,366 × H768 dots) × 3	1,024,000 dots WXGA (W1,280 × H800 dots) × 3	786,432 dots XGA (W1,024 × H768 dots) × 3
	Aspect ratio	16:9	16:10	4:3
Projection lens	Lens	F-number	1.49 - 1.77	1.51 - 1.99
		Focal length	18.2 mm - 29.2 mm	
	Zoom	System	Optical Zoom

*1 Pixel shifting technology achieves Full HD resolution on screen.

*2 Approximate time until the light source brightness decreases to half of its original value.
(Assuming the projector is used in an atmosphere in which airborne particulate matter is less than 0.04 to 0.2mg/m³. The estimated time varies depending on the projector usage and operating conditions.)

*3 Measurement, measuring conditions, and method of notation all comply with ISO 21118 international standards.

*4 Light source brightness automatically dims if the surrounding temperature gets too high. (Approximately 35°C at an altitude of 0 to 2,286 m, and approximately 30°C at an altitude of 2,287 to 3,048 m; however, this may vary depending on the surrounding environment.)

Application and System Requirements

You can use the following applications with your projector.

See the following Web site to check the system requirements and download the necessary application and manuals.

epson.sn/

Applications	Details
USB Display	You can send video and audio output to the projector through the computer's USB port.
Epson iProjection (Windows/Mac)	You can project images from network projectors. You can project up to four images at the same time by splitting the projected screen. computer's USB port.
Epson iProjection (iOS/Android)	You can project image from your mobile devices wirelessly
Epson iProjection (Chromebook)	You can project image from your Chromebook wirelessly.
Epson Projector Management	You can check the status of multiple networked projectors and perform various projector operations from your computer.
Epson Projector Content Manager*	You can create playlists that contain images, movies, or both. You can save them on a USB memory device and play them back from projectors.
Epson Creative Projection*	You can easily create original content using a wide variety of templates.

■ Installation Specifications

Remote Control Operation (Wireless)

Make sure that you aim the remote control at the projector's receivers within the distance and angles listed here.

When installing the cable cover (EB-L255F/EB-L250F)

Installation Position

When installing the projector, make sure there is a gap between the wall and the projector's air exhaust and intake vents as shown in the following image.

Projection Distance Formula

You can calculate the projection distance using the following formulas. You can see a more detailed projection simulation on our Web site.
<https://epson.com/>

- ① Projection distance (cm)
- ② Distance from the center of the lens to the base of the screen (or to the top of the screen, if suspended from a ceiling) (cm)
- ③ Center of lens

EB-L255F/EB-L250F/EB-L200F

<Screen aspect ratio 16:10>

Projection distance formula		
①	Minimum (Wide)	Projection screen size (inch) × 3.16543 - 3.418

■ Monitoring and Control

You can check the status of networked projectors and perform various projector operations using these methods.

Method	Details
ESC/VP21 command	When the projector is connected to a computer with an RS-232C cable, you can control the projector with communication commands.
Epson Web Control	By using the Web browser of a computer connected to the projector on a network, you can set the projector's functions and control the projector.
PJLink command	The projector complies with the PJLink Class2 standard established by the JBMIA. From a computer connected to the projector on a network, you can control the projector with PJLink commands. For more details on PJLink, see the following Web site. http://pjlink.jbmia.or.jp/english/
Art-Net command *	Art-Net is an Ethernet communication protocol based on the TCP/IP protocol. You can control the projector by using a DMX controller or an application system.
Epson Projector Management	Allows you to control multiple Epson projectors on a network. You can download Epson Projector Management from the following Web site. epson.sn/
Crestron Connected	If you are using the Crestron Connected network monitoring and control system, you can set up your projector for use on the system. For additional information on Crestron Connected, visit the Crestron Web site. https://www.crestron.com/products/line/crestron-connected
