Please read the following pdf file how to check the firmware version on the printer. Precautions.pdf - Windows10 Ver.1607 is supported.</p>

Precautions on using Printer Setting

“Printer Setting” is a tool for changing the printer settings of TM-C3400. This tool can collectively change multiple settings of TM-C3400 and helps to reduce a system administrator’s work load. In TM-C3400, new firmware has been introduced and Economy Mode has been added to its Post-Printing Verification Settings. Printers having old firmware do not support Economy Mode.

Identifying the firmware version

The firmware version can be checked using the printer’s Self-test Mode. Follow the steps below to operate Self-test Mode.

- 1 Place a 90mm or longer die-cut label, receipt, or full-page label.
- 2 Turn the power switch ON while holding down the FEED Button. (Do not release the power switch until the LED power indicator starts flashing.)

TM-C3400		Version of Printer Setting to use
Firmware version	Specification	
WSN00180 or later	New firmware Economy Mode supported	Printer Setting V2
Earlier than WSN00180	Old firmware Economy Mode not supported	Printer Setting
