Notations Used in This Guide

Safety Symbols

The projector and its manuals use graphical symbols and labels to indicate content that tells you how to use the projector safely.
Read and carefully follow the instructions that are marked with these symbols and labels to avoid injury to persons or damage to property.

⚠ **Warning**	This symbol indicates information that, if ignored, could possibly result in personal injury or even death.
⚠ **Caution**	This symbol indicates information that, if ignored, could possibly result in personal injury or physical damage due to incorrect handling.

General Information Notations

Attention	This label indicates procedures that may result in damage or injury if sufficient care is not taken.
	This label indicates additional information that may be useful to know.
◯ button	Indicates the buttons on the remote control or the control panel. Example: (Enter) button
Menu/Setting name	Indicates projector menu and setting names. Example: Select the **Image** menu. ☛ **Image** > **Color**
⏩	This label indicates links to the related pages.
☛	This label indicates the projector's current menu level.

Related Links

- "Getting the Latest Version of the Documents" p.9

Using the Manual to Search for Information

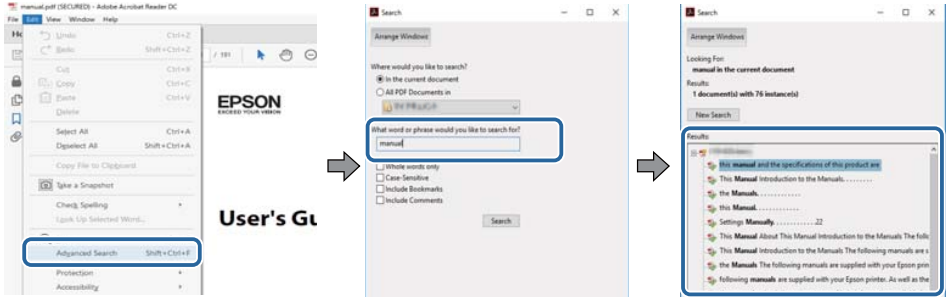
The PDF manual allows you to search for information you are looking for by keyword, or jump directly to specific sections using the bookmarks. You can also print only the pages you need. This section explains how to use a PDF manual that has been opened in Adobe Reader X on your computer.

Related Links

- "Searching by Keyword" p.8
- "Jumping Directly from Bookmarks" p.8
- "Printing Only the Pages You Need" p.8

Searching by Keyword

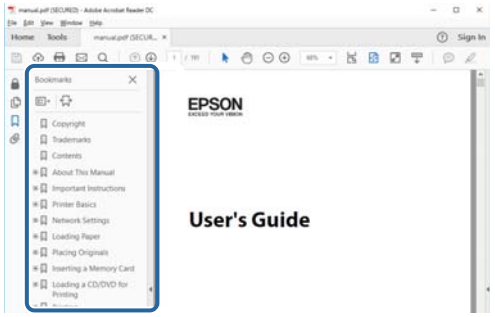
Click **Edit** > **Advanced Search**. Enter the keyword (text) for information you want to find in the search window, and then click **Search**. Hits are displayed as a list. Click one of the displayed hits to jump to that page.



Jumping Directly from Bookmarks

Click a title to jump to that page. Click + or > to view the lower level titles in that section. To return to the previous page, perform the following operation on your keyboard.

- Windows: Hold down **Alt**, and then press ←.
- Mac OS: Hold down the command key, and then press ←.



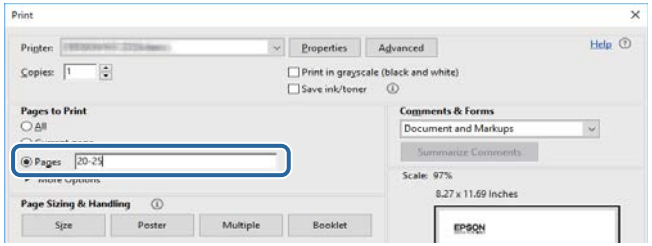
Printing Only the Pages You Need

You can extract and print only the pages you need. Click **Print** in the **File** menu, and then specify the pages you want to print in **Pages** in **Pages to Print**.

- To specify a series of pages, enter a hyphen between the start page and the end page.

  Example: 20-25
- To specify pages that are not in series, divide the pages with commas.

  Example: 5, 10, 15



Getting the Latest Version of the Documents

You can get the latest version of the manuals and specifications on the Epson Web site.

Visit epson.sn, and enter your model name.

Introduction to Your Projector

Refer to these sections to learn more about your projector's features and part names.

Related Links

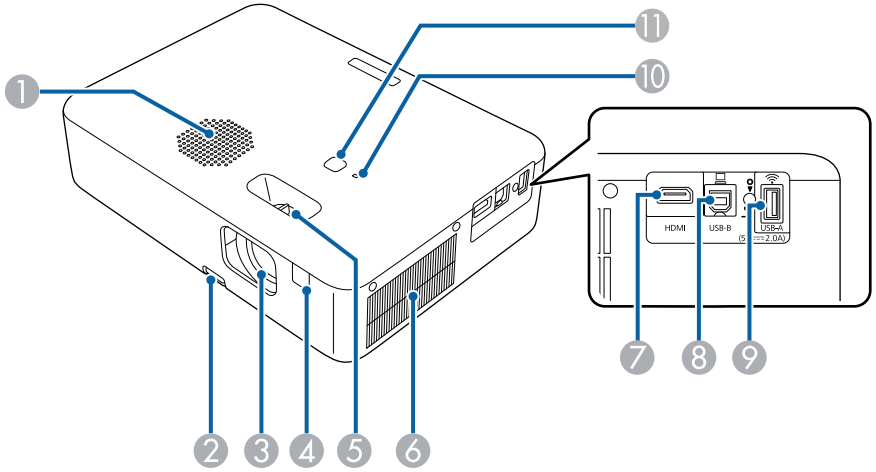
- "Projector Parts and Functions" p.11

The following sections explain the projector parts and their functions.

Related Links

- "Projector Parts - Front" p.11
- "Projector Parts - Rear" p.12
- "Projector Parts - Base" p.13
- "Projector Parts - Projector Remote Control" p.14

Projector Parts - Front



Name		Function
1	Speaker	Outputs audio.
2	Foot release lever	Press the foot release lever to extend and retract the front adjustable foot.
3	Lens	Images are projected from here.
4	Remote receiver	Receives signals from the remote control.

Name		Function
5	Focus lever	Adjusts the image focus.
6	Air intake vent	Takes in air to cool the projector internally.
7	HDMI port	Inputs video signals from HDMI compatible video equipment and computers. This port is compatible with HDCP 2.3.
8	USB-B port	Connects a USB cable to the computer to project computer images.
9	USB-A (5V ⎓ 2.0A) port	Connects a USB memory device or a digital camera and projects movies or images using PC Free. Connects the optional document camera. Connects the wireless LAN module. Hereinafter referred to as the USB-A port.
10	Status indicator	Indicates the projector's status.
11	Power button [⏻]	Turn the projector on or off.

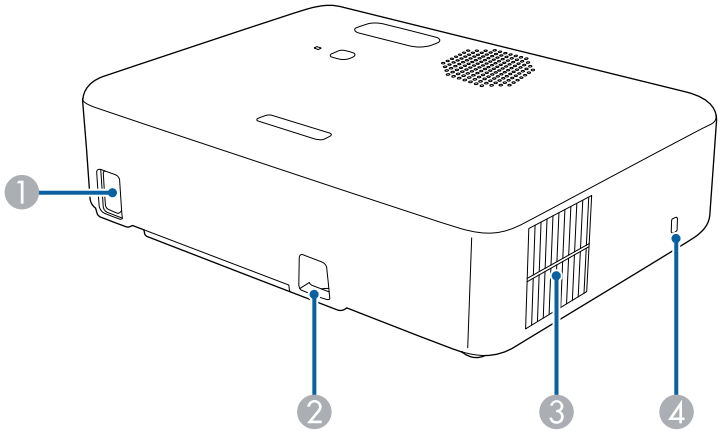
- "Projector Indicator Status" p.111
- "Cleaning the Air Vents " p.108
- "Remote Control Operation" p.21
- "Adjusting the Image Height" p.38

Projector Parts - Rear

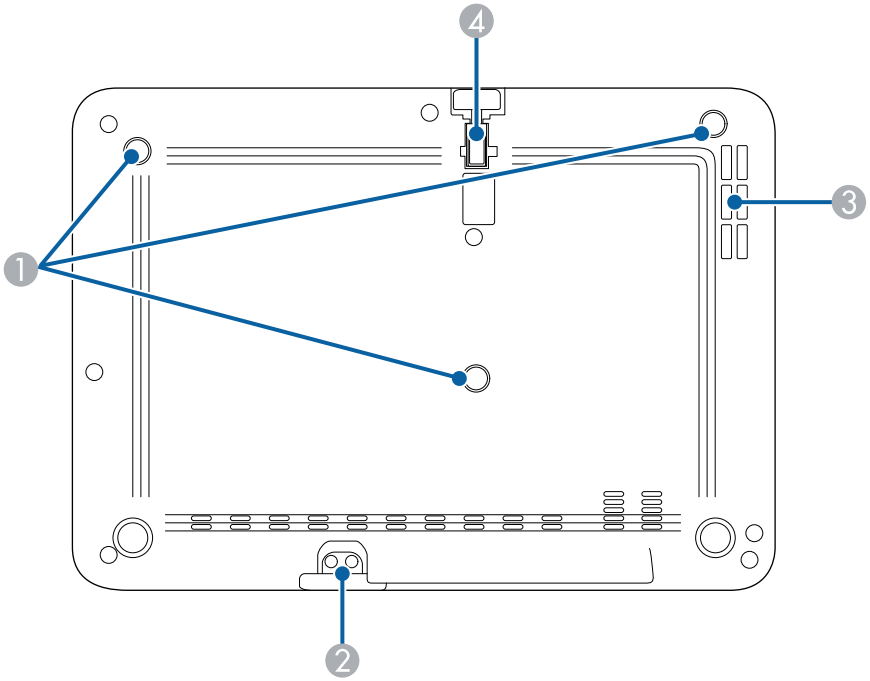


Name		Function
1	Power inlet	Connects the power cord to the projector.
2	Security cable attachment point	Pass a commercially available wire lock through here and lock it in place. You can also attach the optional safety wire here to prevent the projector from falling from the ceiling or wall.
3	Air exhaust vent	Exhaust vent for air used to cool the projector internally. **⚠ Warning** Do not look into the vents. If the lamp explodes, gases may escape and small fragments of glass may be scattered which could cause an injury. Contact a doctor if any fragments of broken glass are inhaled or get into the eyes or mouth. **⚠ Caution** While projecting, do not put your face or hands near the air exhaust vent, and do not place objects that may become warped or damaged by heat near the vent. Hot air from the air exhaust vent could cause burns, warping, or accidents to occur.
4	Security slot	The security slot is compatible with the Microsaver Security System manufactured by Kensington.

Related Links

- "Installing a Security Cable" p.71

Projector Parts - Base



Name		Function
1	Ceiling mount fixing points (three points)	Attach the optional ceiling mount here when suspending the projector from a ceiling.
2	Security cable attachment point	Pass a commercially available wire lock through here and lock it in place. You can also attach the optional safety wire here to prevent the projector from falling from the ceiling or wall.
3	Air intake vent	Takes in air to cool the projector internally.
4	Front adjustable foot	When the projector is set up on a surface such as a desk, extend the foot to adjust the position of the image.

Related Links

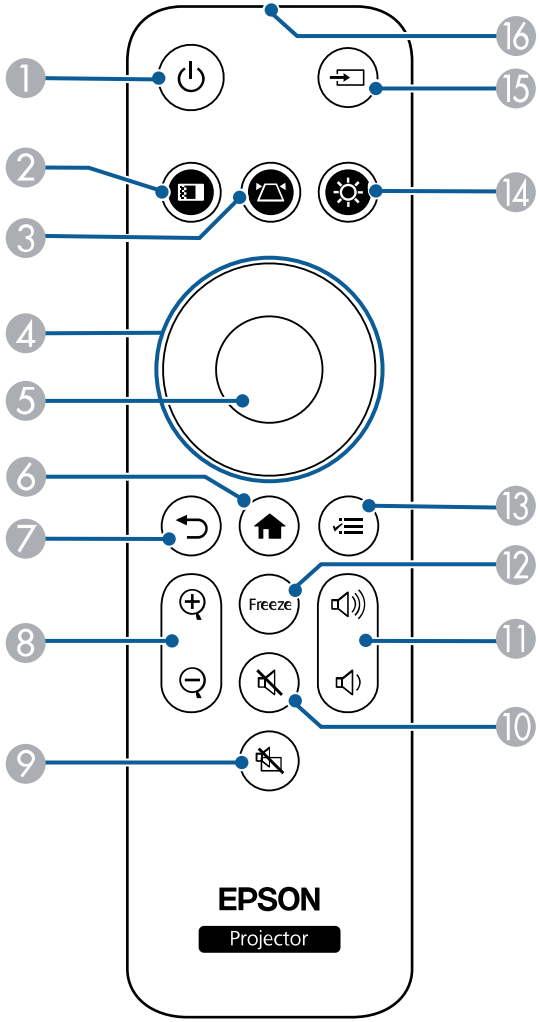
Projector Parts - Projector Remote Control

You can operate your projector using this remote control.



Name		Function
1	Power button	Turns the projector on or off.
2	Color Mode button	Changes the color mode.
3	Keystone button	Displays the **Keystone** adjustment screen or the **Quick Corner** screen.
4	Arrow buttons	Selects menu items while displaying the projector's menu. When the ▲▼ or ◀ ▶ icons are displayed on the menu screen, use these buttons to select the menu items.
5	[Enter] button	Enters the current selection and moves to the next level while displaying the projector's menu.
6	Home button	Displays and closes the Home screen.
7	Esc button	Stops the current function. Moves back to the previous menu level while displaying the projector's menu.
8	E-Zoom buttons	Zooms into an area of the projected image and enlarges it on the screen.
9	A/V Mute button	Turns the video and audio on or off temporarily.

Name		Function
⑩	Mute button	Turns the audio on or off temporarily.
⑪	Volume up/down buttons 	Adjusts the volume for the speaker and headphones.
⑫	Freeze button	Pauses or resumes images.
⑬	Menu button	Displays and closes the projector's menu. You can use the projector's menus to adjust the settings that control how your projector works.
⑭	Brightness button	Adjusts the brightness of the projected image.
⑮	Source button	Switches to the next input source.
⑯	Remote control light emitting area	Outputs remote control signals.

Setting Up the Projector

Follow the instructions in these sections to set up your projector.

Related Links

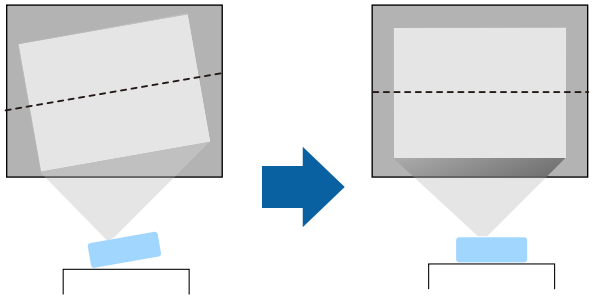
- "Projector Placement" p.17
- "Installing the Safety Wire" p.20
- "Installing Batteries in the Remote Control" p.21
- "Projector Connections" p.23

You can place the projector on almost any flat surface to project an image.

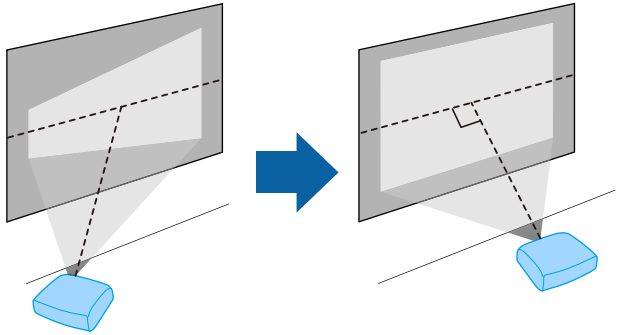
You can also install the projector in a ceiling mount if you want to use it in a fixed location. An optional ceiling mount is required when suspending the projector from a ceiling.

Note the following points when selecting a projector location:

- Place the projector on a sturdy and level surface.



- Leave plenty of space around and under the projector for ventilation, and do not place it on top of or next to anything that could block the vents.
- Place the projector so it squarely faces the screen, not at an angle.



If you cannot install the projector squarely facing the screen, correct any resulting keystone distortion using the projector controls. For the best quality images, we recommend adjusting the installation position of the projector to achieve the correct image size and shape.

⚠ Warning

- You must install a ceiling mount when suspending the projector from a ceiling. If you do not install the projector correctly, it could fall and cause damage or injury.
- Do not use adhesives on the ceiling mount fixing points to prevent the screws from loosening, or use lubricants, oils, or similar substances on the projector; the projector case may crack causing it to fall from its ceiling mount. This could cause serious injury to anyone under the ceiling mount and could damage the projector.
- Failure to install the ceiling mount and projector may cause the projector to fall. After installing the specific Epson mount that supports your projector, make sure you secure the mount to all of the projector's ceiling mount fixing points. Also, secure the projector and the mounts using wire that is strong enough to hold their weight.
- Do not install the projector in a location subject to high levels of dust or humidity, or in a location subject to smoke or steam. Otherwise, it could cause a fire or electric shock to occur. The projector's case could also deteriorate and be damaged causing the projector to fall from the mount.

  Examples of environments that could cause the projector to fall due to case deterioration

  - Locations subject to excessive smoke or airborne oil particles, such as factories or kitchens
  - Locations containing volatile solvents or chemicals, such as factories or laboratories
  - Locations where the projector could be subjected to detergents or chemicals, such as factories or kitchens
  - Locations in which aroma oils are often used, such as relaxation rooms
  - Near devices that produce excessive smoke, airborne oil particles, or foam at events
  - Locations where the projector could be subjected to ultraviolet rays, such as a sunny room
  - Locations near humidifiers

⚠ Warning

- Do not cover the projector's air intake or air exhaust vents. If the vents are covered, the internal temperature could rise and cause a fire.
- Do not use or store the projector in locations where it will be subject to dust or dirt. Otherwise, the quality of the projected image may decline, or the air filter may become clogged, resulting in a malfunction or fire.
- Do not install the projector on an unstable surface or in a location beyond the weight specifications of the projector. Otherwise, it could fall or topple causing an accident and injury.
- Do not use the projector on a flammable surface (such as a newspaper, plastic sheet, or carpet) or an electric carpet. The high heat generated by the projector could deform or discolor them, resulting in a fire.
- When installing the projector in a high position, take measures to prevent falling by using wires to ensure safety in an emergency, such as an earthquake, and to prevent accidents. If it is not installed correctly, it could fall causing an accident and injury.
- Do not install in locations where salt damage could occur, or in locations subject to corrosive gas such as sulphuric gas from hot springs. Otherwise, corrosion could cause the projector to fall. It could also cause the projector to malfunction.
- When using the projector outdoors at night, be careful not to trip over any extension power cords you are using. Otherwise, the projector could fall or topple causing an accident and injury.

Attention

- Do not operate the projector on its side. This may cause the projector to malfunction.
- If you are using the projector at altitudes above 1,500 m, set the **High Altitude Mode** setting to **On** in the projector's menu to ensure the projector's internal temperature is regulated properly.

  ☛ **Settings** > **Operation** > **High Altitude Mode**
- Try not to setup the projector in locations subject to high humidity and dust, or in locations subject to smoke from fires or tobacco smoke.

- "Adjusting the Image Height" p.38
- "Focusing the Image Using the Focus Lever" p.42

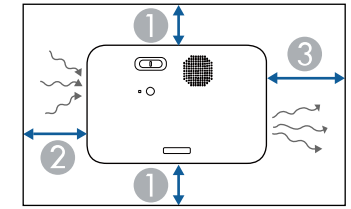
Precautions on Installation

Note the following precautions when installing the projector.

Installation space

Attention

- Be sure to leave the following amount of space around the projector so as not to block the air exhaust and intake vents.
- Do not install the projector in a location that does not allow air to circulate, such as on a shelf or in a box.

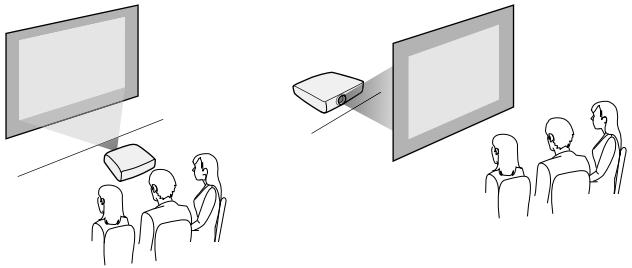


1. 10 cm
2. 20 cm
3. 30 cm

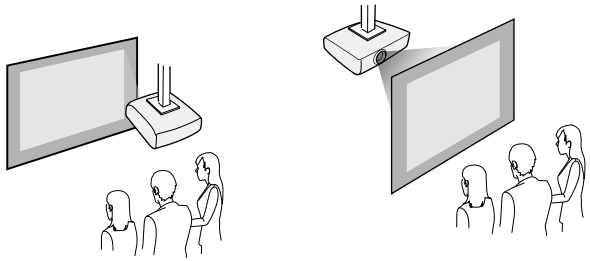
Projector Setup and Installation Options

You can set up or install your projector in the following ways:

Front/Rear



Front Ceiling/Rear Ceiling



Make sure you select the correct **Projection** option in the projector's **Settings** menu according to the installation method being used.

☛ **Settings** > **Installation** > **Projection**

Related Links

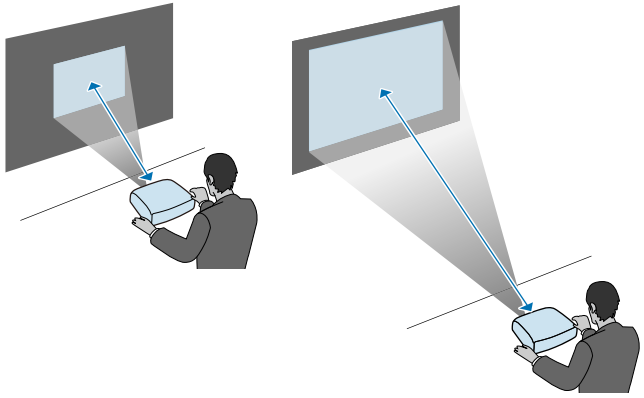
- "Projection Modes" p.33

Projection Distance

The distance at which you place the projector from the screen determines the approximate size of the image. The image size increases the farther the projector is from the screen, but can vary depending on the zoom factor, aspect ratio, and other settings.

See the Appendix for details about how far to place the projector from the screen based on the size of the projected image.

When correcting keystone distortion, your image is slightly smaller.



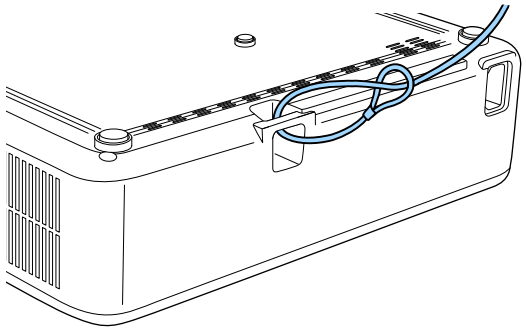
Related Links

- "Screen Size and Projection Distance" p.126

When installing the projector in a high location such as a ceiling, wall, or shelf, install the optional safety wire set to secure the projector to the installation location and prevent it from falling.

> **⚠ Warning**
>
> Be sure to use the safety wire provided with the Epson ceiling mount. The safety wire is available as an optional Safety Wire Set ELPWR01.

1 Pass the safety wire through the security cable attachment point on the projector.



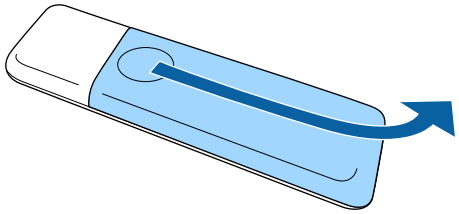
2 Attach the other end of the safety wire to a structure that is strong enough to bear the projector's weight, such as a commercially available mounting hardware. If the wire is too long, loop the wire around so that there is as little slack as possible.

The remote control uses the two AAA batteries that came with the projector.

Attention

Make sure you read the *Safety Instructions* before handling the batteries.

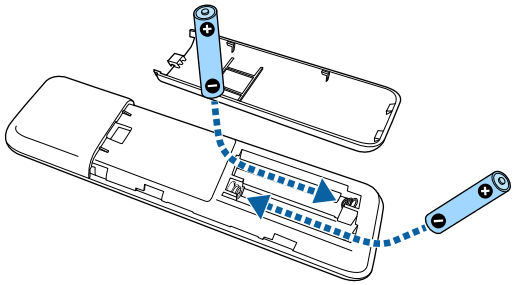
1 Remove the battery cover as shown.



2 Remove the old batteries, if necessary.

Dispose of used batteries according to local regulations.

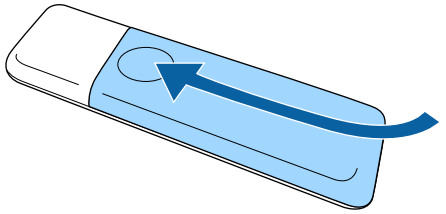
3 Insert the batteries with the + and – ends facing as shown.



⚠ Warning

Check the positions of the (+) and (–) marks inside the battery holder to ensure the batteries are inserted the correct way. If the batteries are not used correctly, they could explode or leak causing a fire, injury, or damage to the product.

4 Replace the battery cover and press it down until it clicks into place.



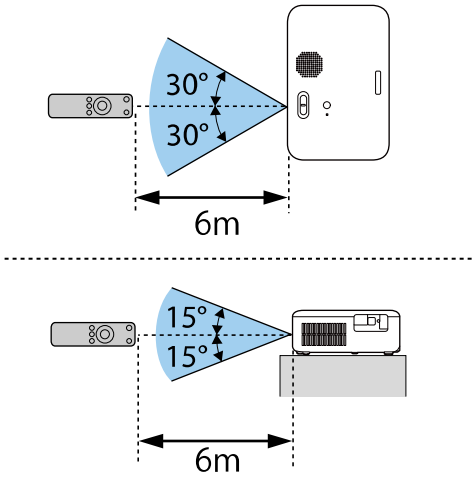
Related Links

- "Remote Control Operation" p.21

Remote Control Operation

The remote control lets you control the projector from almost anywhere in the room.

Make sure that you aim the remote control at the projector's receivers within the distance and angles listed here.



- Avoid using the remote control in conditions with bright fluorescent lights or in direct sunlight, or the projector may not respond to commands. If you are not going to use the remote control for a long time, remove the batteries.

See these sections to connect the projector to a variety of projection sources.

Attention

- Check the shape and orientation of the connectors on any cable you plan to connect. Do not force a connector into a port if it does not fit. The device or your projector could be damaged or could malfunction.

See the *Quick Start Guide* for a list of cables supplied with your projector. Purchase optional or commercially available cables when necessary.

Related Links

- "Connecting to Video Sources" p.23
- "Connecting to a Computer" p.23
- "Connecting to External USB Devices" p.25
- "Connecting to a Document Camera" p.26

Connecting to Video Sources

Follow the instructions in these sections to connect video devices to the projector.

- If the port on the device you connect has an unusual shape, use the cable supplied with the device or an optional cable to connect to the projector.
- The cable differs depending on the output signal from the connected video devices.
- Some video devices are capable of outputting different types of signals. See your video device manual to confirm what type of signals can be output.

Related Links

- "Connecting to an HDMI Video Source" p.23

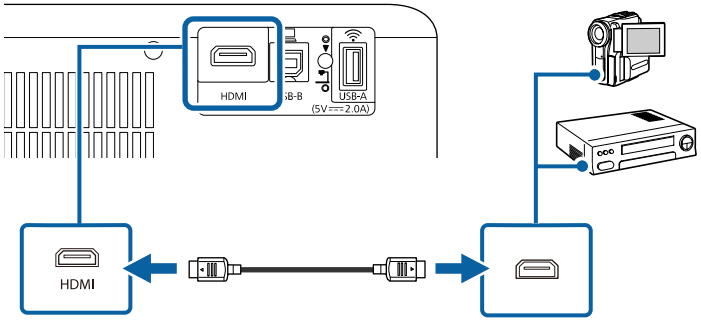
Connecting to an HDMI Video Source

If your video source has an HDMI port, you can connect it to the projector using an HDMI cable and send the image source's audio with the projected image.

Attention

Do not turn on the video source before connecting it to the projector. Doing so could damage the projector.

1. Connect the HDMI cable to your video source's HDMI output port.
2. Connect the other end to the projector's HDMI port.



Connecting to a Computer

Follow the instructions in these sections to connect a computer to the projector.

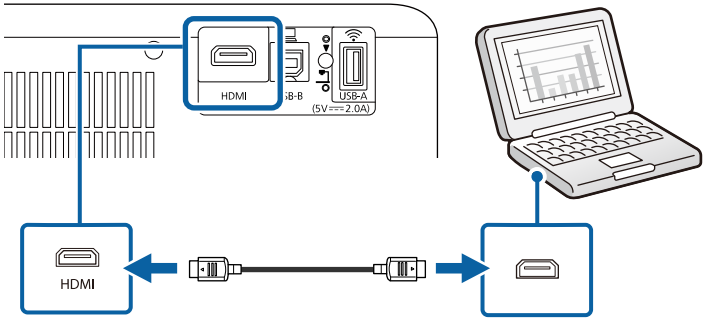
Related Links

- "Connecting to a Computer for HDMI Video and Audio" p.24
- "Connecting to a Computer for USB Video and Audio" p.24
- "Connecting to an iPad/iPhone" p.25

Connecting to a Computer for HDMI Video and Audio

If your computer has an HDMI port, you can connect it to the projector using an HDMI cable and send the computer's audio with the projected image.

1. Connect the HDMI cable to your computer's HDMI output port.
2. Connect the other end to the projector's HDMI port.

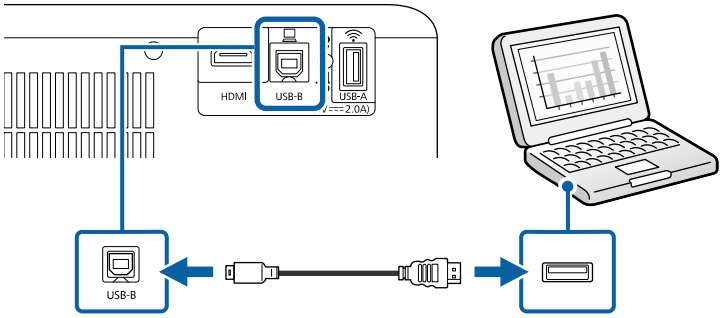


Connecting to a Computer for USB Video and Audio

If your computer meets the system requirements, you can send video and audio output to the projector through the computer's USB port. This function is called USB Display. Connect the projector to your computer using a USB cable.

- If you use a USB hub, the connection may not operate correctly. Connect the USB cable directly to the projector.

1. Connect the cable to your projector's USB-B port.



2. Connect the other end to any available USB port on your computer.
3. Turn on the projector and your computer.
4. Do one of the following to install the Epson USB Display software:

You only need to install this software the first time you connect the projector to the computer.

- Windows: Select **Run EMP_UDSE.EXE** in the dialog box that is displayed to install the Epson USB Display software.
- Mac: The Epson USB Display setup folder is displayed on your screen. Select **USB Display Installer** and follow the on-screen instructions to install the Epson USB Display software. If the USB Display **Setup** folder is not displayed automatically, double-click **EPSON_PJ_UD** > **USB Display Installer**.

5. Follow any on-screen instructions.

Do not disconnect the USB cable or turn off the projector until the projector displays an image.

The projector displays the image from your computer's desktop and outputs sound if your presentation contains audio.

- If the projector does not project any images, do one of the following:
  - Windows: Click **All Programs** or **Start** > **EPSON Projector** > **Epson USB Display Ver.x.xx**.
  - Mac: Double-click the **USB Display** icon in the **Application** folder.
- When you finish projection, do one of the following:
  - Windows: Disconnect the USB cable. You do not need to operate **Safely Remove Hardware**.
  - Mac: Select **Disconnect** from the **USB Display** icon menu on the menu bar or **Dock**, and then disconnect the USB cable.

Related Links

- "USB Display System Requirements" p.133

Connecting to an iPad/iPhone

You can connect your iPad/iPhone to project videos. To connect your device to the projector's HDMI port, use a commercially available cable such as an HDMI conversion adapter.

Connecting to External USB Devices

Follow the instructions in these sections to connect external USB devices to the projector.

Related Links

- "USB Device Projection" p.25
- "Connecting to a USB Device" p.25
- "Disconnecting a USB Device" p.26

USB Device Projection

You can project images and other content without using a computer or video device by connecting any of these devices to your projector:

- USB flash drive
- Digital camera or smartphone
- USB hard drive

- Digital cameras or smartphones must be USB-mounted devices, not TWAIN-compliant devices, and must be USB Mass Storage Class-compliant.
- USB hard drives must meet these requirements:
  - USB Mass Storage Class-compliant (not all USB Mass Storage Class devices are supported)
  - Formatted in FAT16/32
  - Self-powered by their own AC power supplies (bus-powered hard drives are not recommended)
  - Avoid using hard drives with multiple partitions

Related Links

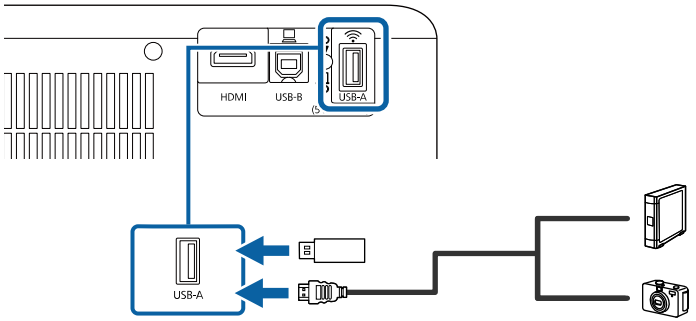
- "Projecting a PC Free Presentation" p.57

Connecting to a USB Device

You can connect your USB device to the projector's USB-A port and use it to project images and other content.

1. If your USB device came with a power adapter, plug the device into an electrical outlet.

2. Connect the USB cable or USB flash drive to the projector's USB-A port as shown.



Attention

- Use the USB cable supplied with or specified for use with the device.
- Do not connect a USB hub or a USB cable longer than 3 meters, or the device may not operate correctly.

3. Connect the other end to your device, if necessary.

Disconnecting a USB Device

When you have finished projecting with a connected USB device, disconnect the device from the projector.

1. Turn off and unplug the device, if necessary.

2. Disconnect the USB device from the projector.

Connecting to a Document Camera

You can connect a document camera to your projector to project images viewed by the camera.

The connection method varies depending on your Epson document camera model. See the document camera manual for details.

Using Basic Projector Features

Follow the instructions in these sections to use your projector's basic features.

Related Links

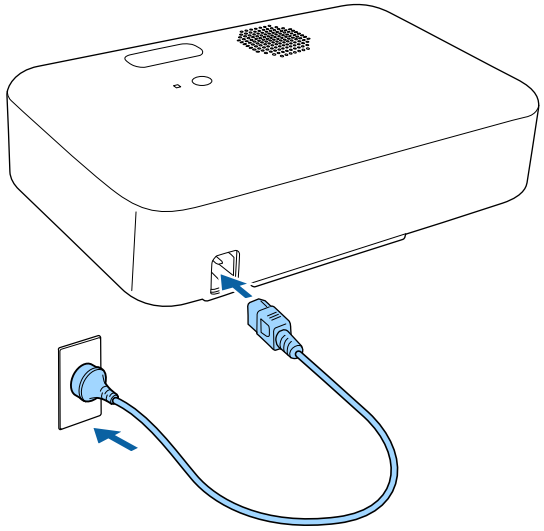
- "Controlling the Volume with the Volume Buttons" p.49

Turn on the computer or video device you want to use after you turn on the projector.

1 Connect the device to the projector.

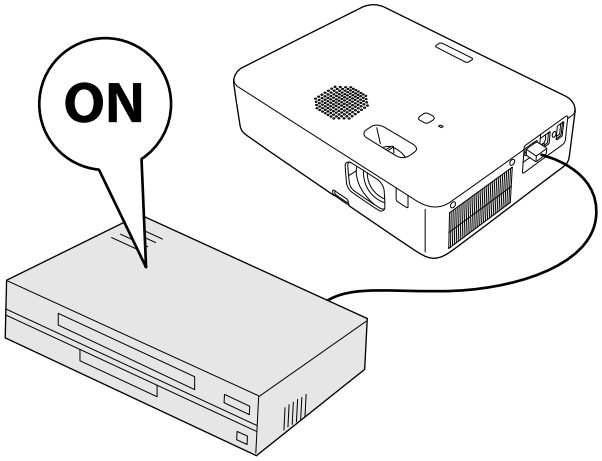
2 Connect the power cord to the projector's power inlet and plug it into an electrical outlet.



3 Press the power button on the projector or remote control to turn on the projector.

The status indicator flashes blue as the projector warms up. Once the projector is warmed up, the status indicator stops flashing and turns blue.

4 Turn on the connected device.



5 Try the following if you do not see a projected image.

- Turn on the connected computer or video device.
- Change the screen output from the computer when using a laptop computer.
- Insert a DVD or other video media, and press play (if necessary).
- Press the button on the remote control to detect the source.
- If the Home screen is displayed, select the source you want to project.

⚠ Warning

- Never look into the projector lens when the lamp is on. This can damage your eyes and is especially dangerous for children.
- When turning on the projector at a distance using the remote control, make sure there is no one looking into the lens.
- During projection, do not touch the projector. The high heat generated by the projector lamp may cause a burn or injury.
- During projection, do not block the light from the projector with a book or other objects. If the light from the projector is blocked, the area on which the light shines becomes hot which could cause it to melt, burn, or start a fire. Also, the lens may get hot due to the reflected light which could cause the projector to malfunction. To stop projection, use the A/V Mute function, or turn off the projector.
- A mercury lamp with high internal pressure is used as the projector's light source. If the lamp is subjected to vibrations or shocks, or if it is used for an overly extended length of time, the lamp may break or it may not turn on. If the lamp explodes, gases may escape and small fragments of glass may be scattered which could cause an injury. Be sure to observe the instructions below.
  - Do not bring your face close to the projector while it is in use.
  - Do not swing or tilt the projector. Shards of glass may fall out and could cause an injury. Be very careful not to allow such pieces of glass to enter your eyes or mouth.
- If the lamp breaks, ventilate the area immediately, and contact a doctor if any fragments of broken glass are inhaled or get into the eyes or mouth.
- Do not turn the projector back on immediately after turning off the projector. Turning the projector on/off too frequently can shorten the lamp life.

- When the **Direct Power On** setting is set to **On** in the projector's **Settings** menu, the projector turns on as soon as you plug it in. Note that the projector also turns on automatically in cases such as recovery from a power outage.

  ☛ **Settings** > **Operation** > **Direct Power On**
- If you select a specific port as the **Auto Power On** setting in the projector's **Settings** menu, the projector turns on as soon as it detects a signal or cable connection from that port.

  ☛ **Settings** > **Operation** > **Auto Power On**

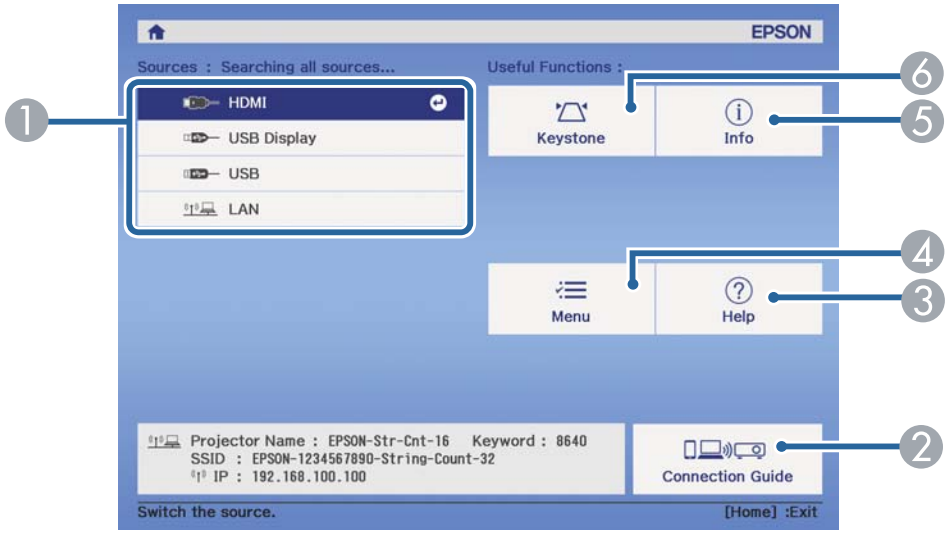
Home Screen

The Home screen feature allows you to easily select an image source and access useful functions. You can display the Home screen by pressing the button on the remote control. The Home screen is also displayed when you turn on the projector and no signal is being input.

Press the arrow buttons on the remote control to select a menu item, and then press [Enter].



1. Selects the source you want to project.
2. Displays the Connection Guide. You can select the wireless connection methods according to the devices you are using, such as smartphones or computers.
3. Displays the Help screen.
4. Displays the projector's menu.
5. Displays the projector information.
6. Corrects the shape of an image that is an uneven rectangle.

After 10 minutes of inactivity, the Home screen disappears and you are returned to the screen that you were on before (the current input source screen or no signal message).

Turning Off the Projector

Turn off the projector after use.

- Turn off this product when it is not in use to prolong the life of the projector. Lamp life varies depending on the mode selected, environmental conditions, and usage. Brightness decreases over time.
- Since the projector supports the direct shutdown feature, it can be turned off directly using the breaker.

1 Press the power button on the projector or remote control.
The projector displays a shutdown confirmation screen.

2 Press the power button again. (To leave it on, press any other button.)
The projected image disappears and the status indicator turns off.

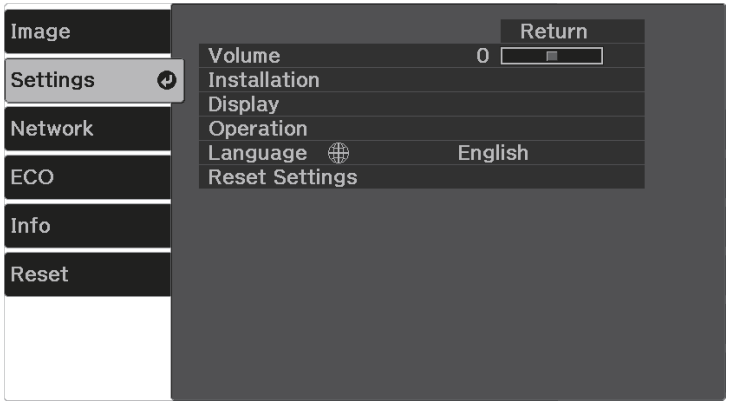
With Epson's Instant Off technology, there is no cool-down period so you can pack up the projector for transport right away.

3 To transport or store the projector, make sure the status indicator on the projector is off, and then unplug the power cord.

Selecting the Language for the Projector Menus

If you want to view the projector's menus and messages in another language, you can change the **Language** setting.

1. Turn on the projector.
2. Press the button on the remote control.
3. Select the **Settings** menu and press [Enter].



4. Select the **Language** setting and press [Enter].
5. Select the language you want to use and press [Enter].
6. Press or to exit the menus.

Depending on how you positioned the projector, you may need to change the projection mode so your images project correctly.

- **Front** lets you project from a table in front of the screen.
- **Front/Upside Down** flips the image over top-to-bottom to project upside-down from a ceiling or wall mount.
- **Rear** flips the image horizontally to project from behind a translucent screen.
- **Rear/Upside Down** flips the image over top-to-bottom and horizontally to project from a ceiling or wall mount and behind a translucent screen.

- "Projector Setup and Installation Options" p.19

Changing the Projection Mode Using the Remote Control

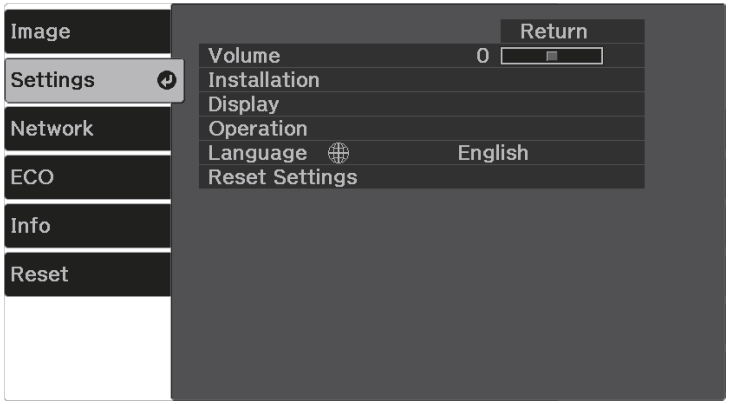
You can change the projection mode to flip the image over top-to-bottom.

1. Turn on the projector and display an image.
2. Hold down the button on the remote control for five seconds.
   The image disappears briefly and reappears flipped top-to-bottom.
3. To change projection back to the original mode, hold down the button for five seconds again.

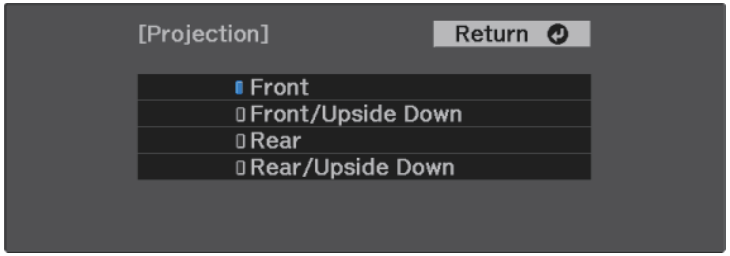
Changing the Projection Mode Using the Menus

You can change the projection mode to flip the image over top-to-bottom and/or left-to-right using the projector menus.

1. Turn on the projector and display an image.
2. Press the button on the remote control.
3. Select the **Settings** menu and press [Enter].



4. Select **Installation** > **Projection** and press [Enter].
5. Select a projection mode and press [Enter].



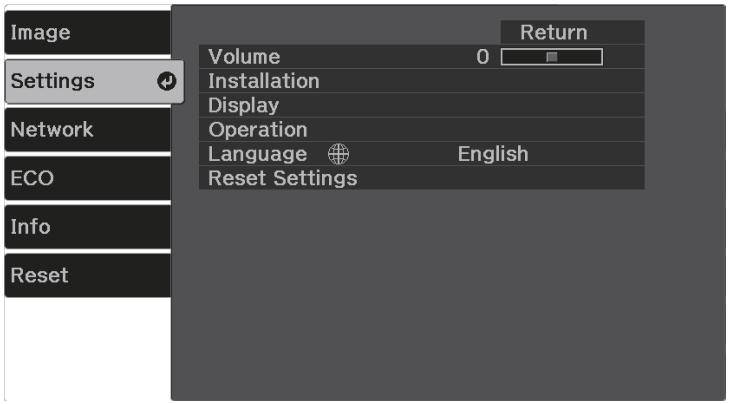
6 Press ☰ to exit the menus.

You can use the Screen Type setting to match the aspect ratio of the displayed image to the screen you are using (CO-W01/CO-WX01/CO-WX02).

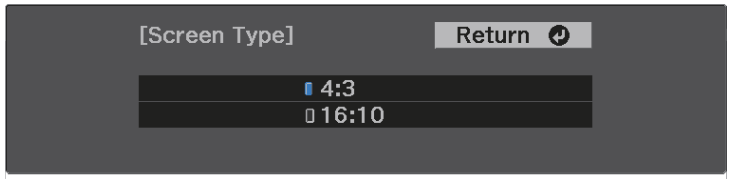
This setting is unavailable when using one of the following input sources:

- USB Display
- USB
- LAN

1. Turn on the projector and display an image.
2. Press the button on the remote control.
3. Select the **Settings** menu and press [Enter].



4. Select **Installation** > **Screen** > **Screen Type**.
   You see this screen:



5. Select your screen's aspect ratio and press [Enter].
6. Press to exit the menus.
7. Adjust the aspect ratio for the projected image, if necessary.

Related Links

- "Adjusting the Image Position Using Screen Position" p.35

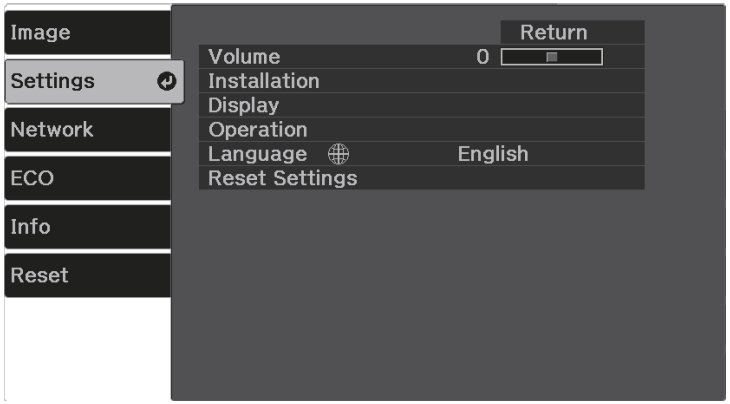
Adjusting the Image Position Using Screen Position

You can adjust the image position if there are margins between the edge of the image and the projected screen frame.

You cannot adjust the screen position if the **Screen Type** setting is set to **16:10**.

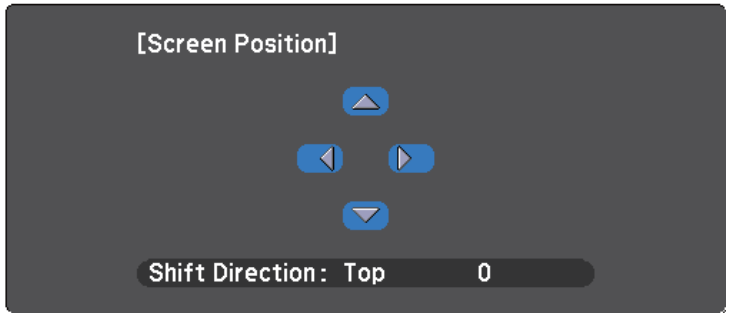
1. Turn on the projector and display an image.
2. Press the button on the remote control.

3 Select the **Settings** menu and press [Enter].



4 Select **Installation** > **Screen** > **Screen Position**.

5 Use the arrow buttons on the remote control to adjust the position of the image.

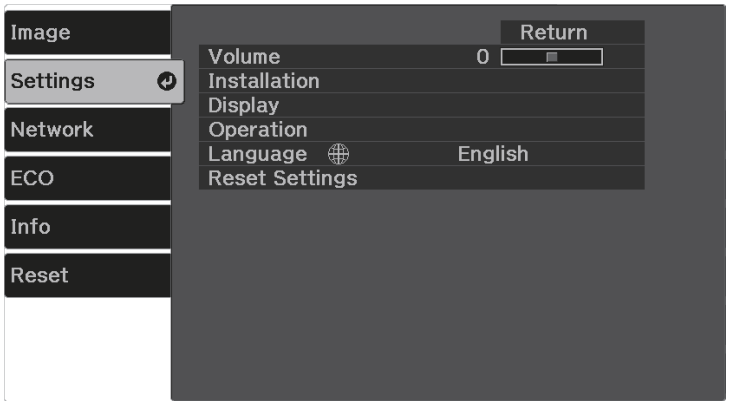


6 When you are finished, press ☰.

You can display a test pattern to adjust the projected image without connecting a computer or video device.

- The test pattern's shape is determined by the **Screen Type** setting. Be sure to set the correct screen type before adjusting with the test pattern.
  ☛ **Settings** > **Installation** > **Screen** > **Screen Type**
- To set menu items that cannot be set while the test pattern is being displayed or to fine-tune the projected image, project an image from the connected device.

1. Turn on the projector.
2. Press the button on the remote control.
3. Select the **Settings** menu and press [Enter].



4. Select **Installation** > **Pattern** > **Test Pattern**, and press [Enter].
   The test pattern is displayed.
5. Adjust the image as necessary by adjusting the focus or changing the projector position.
6. Press to clear the test pattern.

Adjusting the Image Height

If you are projecting from a table or other flat surface and the image is too high or low, you can adjust the image height using the projector's adjustable foot.

The larger the angle of tilt, the harder it becomes to focus. Locate the projector so that it only needs to be tilted at a small angle.

1. Turn on the projector and display an image.
2. Press the foot release lever to extend and retract the front adjustable foot.

   The foot extends from the projector.

   You can adjust the position up to 12 degrees.

3. Release the lever to lock the foot.

If the projected image is unevenly rectangular, you need to adjust the image shape.

Related Links

- "Image Shape" p.39

You can project an even, rectangular image by placing the projector directly in front of the center of the screen and keeping it level. If you place the projector at an angle to the screen, or tilt it up or down, or off to the side, you may need to correct the image shape.

After correction, your image is slightly smaller.

For the best quality images, we recommend adjusting the installation position of the projector to achieve the correct image size and shape.

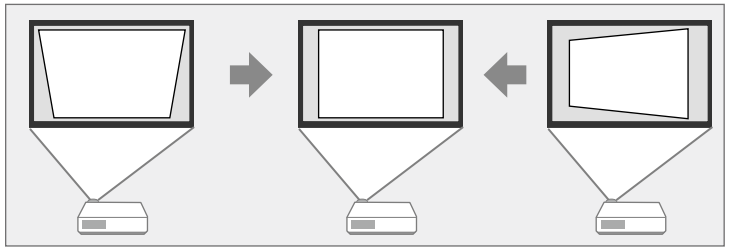
Correcting the Image Shape with the Keystone Button

You can correct the shape of an image that is unevenly rectangular.

To correct the distortion in the horizontal and vertical directions independently, use the button on the remote control.



- You cannot combine H/V-Keystone correction with other image shape correction methods.
- You can correct keystone distortion by up to 30º right, left, up, or down.

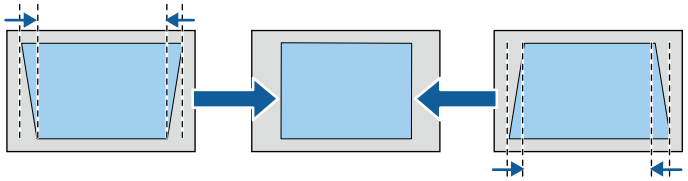
1 Turn on the projector and display an image.

2 Press the button on the remote control, select **H/V-Keystone**, and then press [Enter].

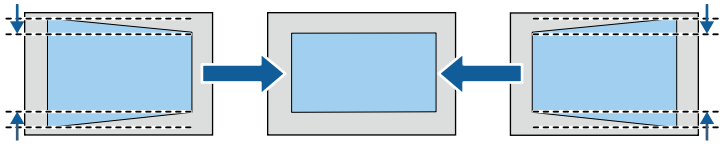
You see the **Keystone** adjustment screen:

3 Use the arrow buttons on the remote control to select between vertical and horizontal keystone correction and to adjust the image shape as necessary.

- **V-Keystone**



- **H-Keystone**



4 When you are finished, press .

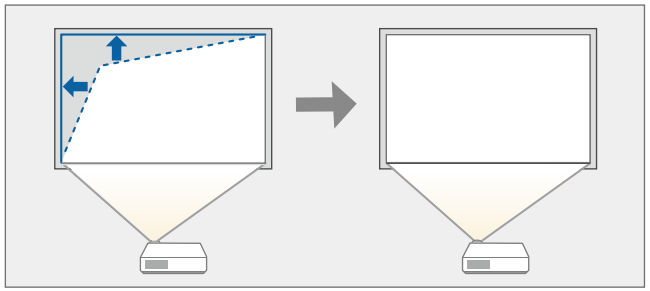
After correction, your image is slightly smaller.

Related Links

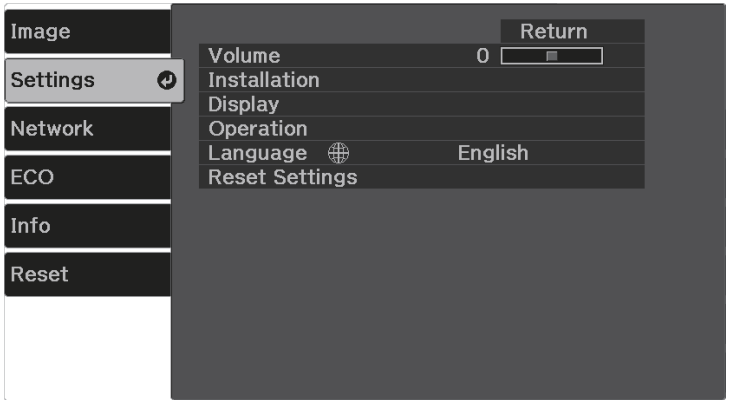
- "Projector Feature Settings - Settings Menu" p.87

Correcting the Image Shape with Quick Corner

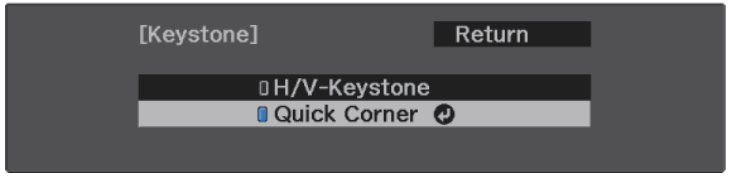
You can use the projector's **Quick Corner** setting to correct the shape and size of an image that is unevenly rectangular.



1. Turn on the projector and display an image.
2. Press the button on the remote control.
3. Select the **Settings** menu and press [Enter].

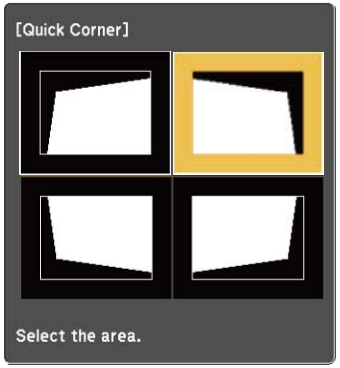


4. Select **Installation** > **Keystone** and press [Enter].
5. Select **Quick Corner** and press [Enter]. Then press [Enter] again if necessary.



You see the area selection screen.

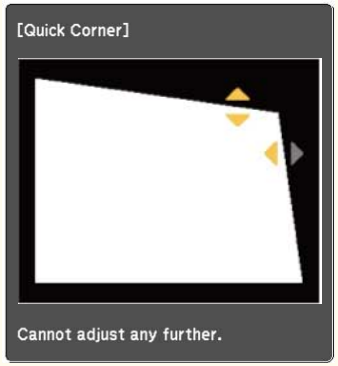
6. Use the arrow buttons to select the corner of the image you want to adjust. Then press [Enter].



To reset the Quick Corner corrections, hold down for about two seconds while the area selection screen is displayed, and then select **Yes**.

7. Press the arrow buttons to adjust the image shape as necessary.
   To return to the area selection screen, press [Enter].

If you see this screen, you cannot adjust the shape any further in the direction indicated by the gray triangle.



8 Repeat steps 6 and 7 as needed to adjust any remaining corners.

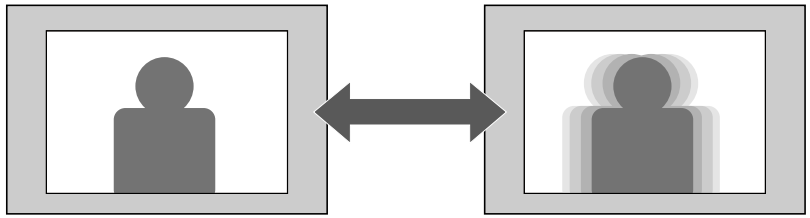
9 When you are finished, press .

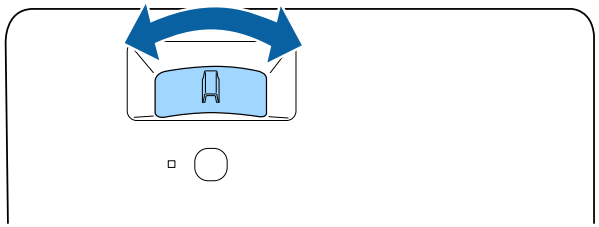
Related Links

- "Projector Feature Settings - Settings Menu" p.87

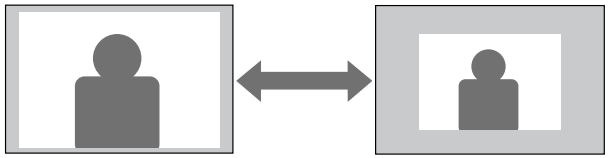
Focusing the Image Using the Focus Lever

You can correct the focus using the focus lever.

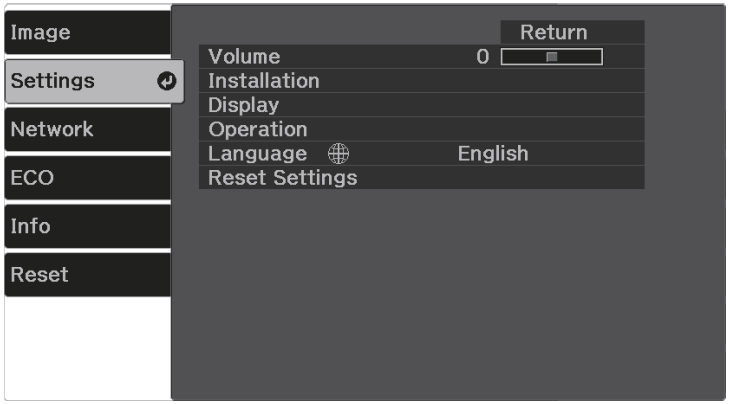




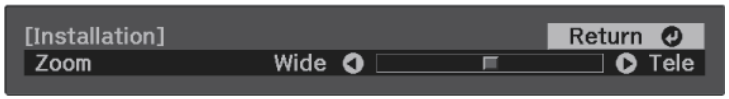
You can resize the image using the projector's menu.



1. Turn on the projector and display an image.
2. Press the button on the remote control.
3. Select the **Settings** menu and press [Enter].



4. Select **Installation** > **Zoom** and press [Enter].
5. Press the left or right arrow button to adjust the zoom setting and press [Enter].



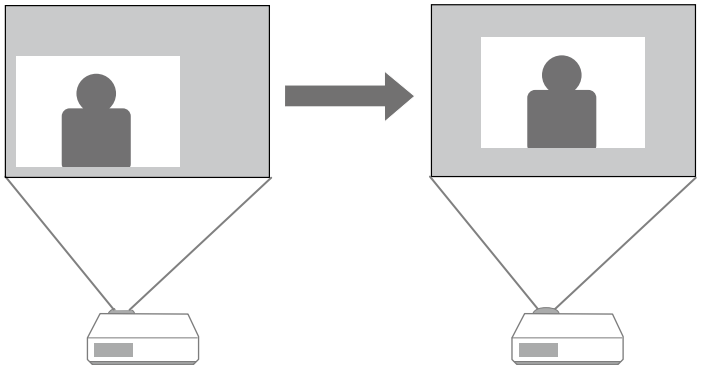
6. Press to exit the menus.

Adjusting the Image Position Using Image Shift

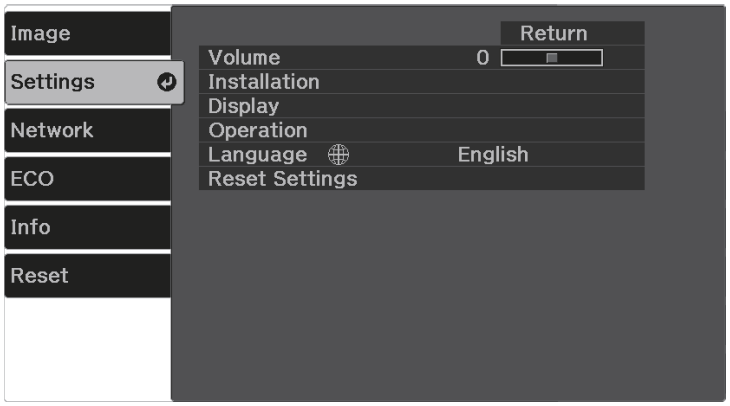
You can use the **Image Shift** feature to adjust the image position without moving the projector.

This feature is not available if **Zoom** is set to the widest setting.

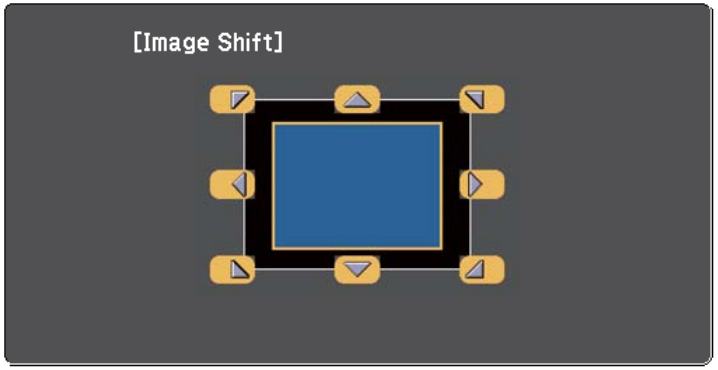
☛ **Settings** > **Installation** > **Zoom**



1. Turn on the projector and display an image.
2. Press the ☰ button on the remote control.
3. Select the **Settings** menu and press [Enter].



4. Select **Installation** > **Image Shift** and press [Enter].
5. Use the arrow buttons to adjust the image position.



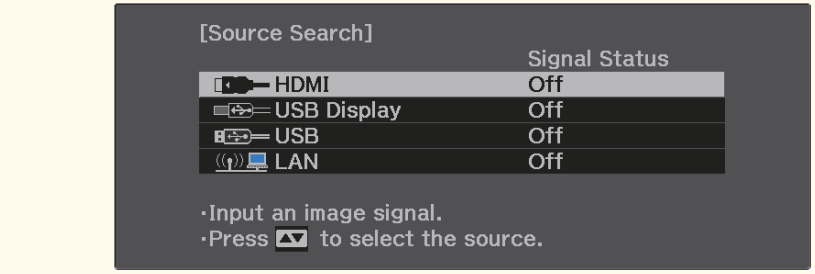
You can shift the image diagonally by pressing any pair of adjacent arrow buttons on the remote control.

6. Press the ⮌ button to close the adjustment screen.

The **Image Shift** setting is retained even if the projector is turned off. You need to re-adjust the position if you change the installation location or angle of the projector.

When multiple image sources are connected to the projector, you can switch from one image source to the other.

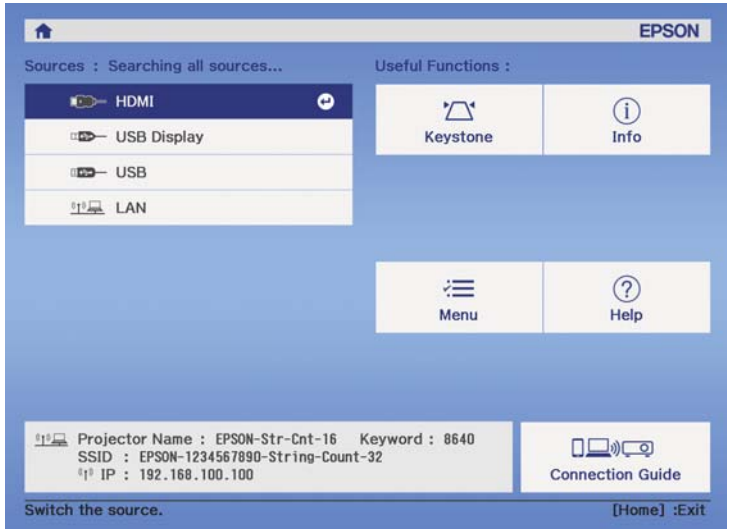
1. Make sure the connected image source you want to use is turned on.
2. For video image sources, insert a DVD or other video media and press play.
3. Do one of the following:
   - Press the button on the remote control until you see the image from the source you want.



This screen is displayed when no image signal is detected. Check the cable connections between the projector and image source.

   - Press the button on the remote control.

     Then select the source you want to use from the screen displayed.



When no image signal is detected, check the cable connections between the projector and the image source.

The projector can display images in different width-to-height ratios called aspect ratios. Normally, the input signal from your video source determines the image's aspect ratio. However, for certain images you can change the aspect ratio to fit your screen.

If you always want to use a particular aspect ratio for a certain video input source, you can select it using the projector's **Image** menu.

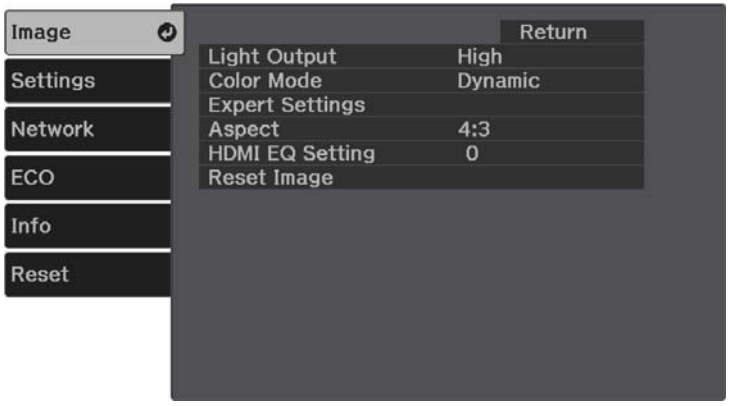
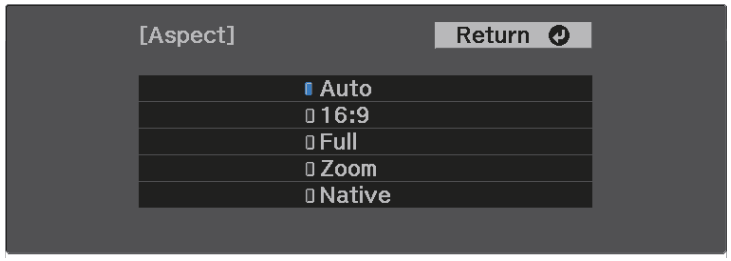
Changing the Image Aspect Ratio

You can change the aspect ratio of the displayed image.

1. Turn on the projector and display an image.
2. Press the button on the remote control.
3. Select the **Image** menu and press [Enter].



4. Select **Aspect** and press [Enter].
5. Select one of the available aspect ratios for your input signal and press [Enter].



6. Press to exit the menus.

The available aspect ratio setting varies depending on the input signal.

Related Links

- "Image Quality Settings - Image Menu" p.85

Available Image Aspect Ratios

You can select the following image aspect ratios, depending on the input signal from your image source.

- The available aspect ratio setting varies depending on the input signal.
- Note that using the aspect ratio function of the projector to reduce, enlarge, or split the projected image for commercial purposes or for public viewing may infringe upon the rights of the copyright holder of that image based on copyright law.

Aspect mode	Description
Auto	Automatically sets the aspect ratio according to the input signal.
16:9	Converts the aspect ratio of the image to 16:9 (CO-W01/CO-WX01/CO-WX02).
Full	Displays images using the full size of the projection area, but does not maintain the aspect ratio.
Zoom	Displays images using the full width of the projection area and maintains the aspect ratio of the image.
Native	Displays images as is (aspect ratio and resolution are maintained).

The projector offers different color modes to provide optimum brightness, contrast, and color for a variety of viewing environments and image types. You can select the mode designed to match your image and environment, or experiment with the available modes.

Related Links

- "Changing the Color Mode" p.48
- "Available Color Modes" p.48

Changing the Color Mode

You can change the projector's Color Mode using the remote control to optimize the image for your viewing environment.

1. Turn on the projector and switch to the image source you want to use.
2. Press the button on the remote control to change the Color Mode.
   The name of the Color Mode appears briefly on the screen and then image appearance changes.
3. To cycle through all of the available color modes for your input signal, press the button repeatedly.

You can also set the **Color Mode** setting in the projector's **Image** menu.

Related Links

- "Image Quality Settings - Image Menu" p.85

Available Color Modes

You can set the projector to use these color modes, depending on the input source you are using:

Color mode	Description
Dynamic	This is the brightest mode. Best for prioritizing brightness.
Vivid	Best for enjoying content with bright colors.
Presentation	Best for projecting vivid images.
Cinema	Best for enjoying content such as movies.
sRGB	Best for faithfully reproducing the color of the source image.
Blackboard	Best for projecting images directly on a green chalkboard.

The volume buttons control the projector's internal speaker system.

You must adjust the volume separately for each connected input source.

- To adjust the volume for connected audio/video system, set the **HDMI Link** setting to **On** and the **Audio Out Device** setting to **AV System** in the projector's **Settings** menu.

  ☛ **Settings** > **Operation** > **HDMI Link** > **HDMI Link**

  ☛ **Settings** > **Operation** > **HDMI Link** > **Audio Out Device**

1. Turn on the projector and start a presentation.
2. To lower or raise the volume, press the or buttons on the remote control.

   A volume gauge appears on the screen.
3. To set the volume to a specific level for an input source, select **Volume** in the projector's **Settings** menu.

⚠ Caution

Do not start a presentation at a high volume setting. Sudden loud noises may cause hearing loss.

Always lower the volume before powering off, so that you can power on and then gradually increase the volume.

- "Saving a User Pattern" p.68
- "Projector Security Features" p.69

You can send images to your projector, as well as monitor and control your projector, over a network.

To perform these operations, you need to do the following first:

- Install the Epson 802.11a/b/g/n wireless LAN module onto the projector.
- Set up your projector and computer using the projector's **Network** menus.
- Download and install the following network software from the following Web site.

  epson.sn

  - Epson iProjection (Windows/Mac) software allows you to hold interactive meetings by projecting the user's computer screen over a network. See the *Epson iProjection Operation Guide (Windows/Mac)* for instructions.
  - Epson iProjection (iOS/Android) app allows you to project from iOS, Android, or Chromebook devices.

    You can download Epson iProjection for free from the App Store or Google Play. Any fees incurred when communicating with the App Store or Google Play are the responsibility of the customer.

If the **Web Control Password** has not been set, a screen prompting you to set a password is displayed when you save the network settings. Follow the on-screen instructions to set the password.

- "Using a QR Code to Connect a Mobile Device" p.55

Installing the Wireless LAN Module

To use the projector over a wireless network, install the Epson 802.11a/b/g/n wireless LAN module. Do not install any other type of wireless LAN module.

Attention

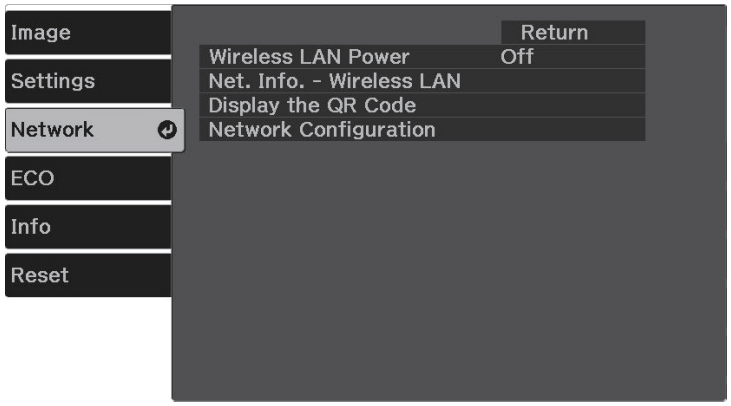
Never remove the module while its indicator is blue or flashing, or while you are projecting wirelessly. This could damage the module or lose data.

1. Turn off the projector and unplug the power cord.
2. Connect the wireless LAN module to the USB-A port.

Selecting Wireless Network Settings Manually

Before you can project from your wireless network, you need to select network settings for the projector.

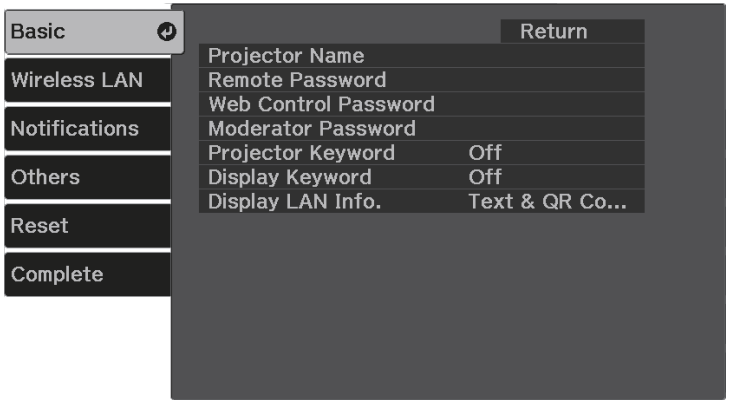
1. Press the button, select the **Network** menu, and press [Enter].



2 Select **On** as the **Wireless LAN Power** setting.

3 Select **Network Configuration** and press [Enter].

4 Select the **Basic** menu and press [Enter].

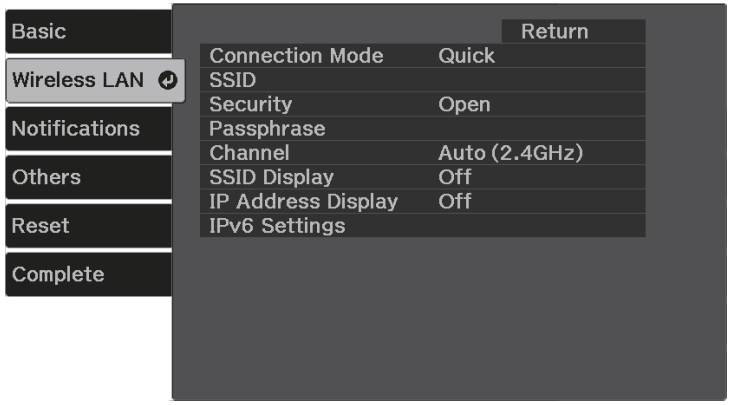


5 Select the basic options as necessary.

- **Projector Name** lets you enter a name up to 16 alphanumeric characters long to identify the projector over the network.
- **Remote Password** lets you enter a password up to 32 alphanumeric characters long to access the projector using the Basic Control. (The user name is EPSONREMOTE. No password is set by default.)
- **Web Control Password** lets you enter a password up to 32 alphanumeric characters long to access the projector over the Web. (The user name is EPSONWEB. No password is set by default.)
- **Moderator Password** lets you enter a four-digit number password for accessing the projector as a moderator using Epson iProjection. (No password is set by default.)
- **Projector Keyword** lets you turn on a security password to prevent access to the projector by anyone not in the room with it. You must enter a displayed, randomized keyword from a computer using Epson iProjection to access the projector and share the current screen.
- **Display Keyword** lets you select whether to display a projector keyword on the projected image when accessing the projector using Epson iProjection.
- **Display LAN Info.** lets you set the display format for the projector's network information.

Use the displayed keyboard to enter numbers and characters. Press the arrow buttons on the remote control to highlight characters and press [Enter] to select them.

6 Select the **Wireless LAN** menu and press [Enter].



7 Select the **Connection Mode** setting.

- **Quick** lets you connect to multiple smartphones, tablets, or computers directly using wireless communication.
- **Advanced** lets you connect to smartphones, tablets, or computers over a wireless network access point.

8 If you selected the **Advanced** connection mode, select **Search Access Point** to select the access point you want to connect to.

> If you need to assign the SSID manually, select **SSID** to enter the SSID.

9 For the **Advanced** connection mode, assign the IP settings for your network as necessary.

- If your network assigns addresses automatically, select **IP Settings** to set the **DHCP** setting to **On**.
- If you must set addresses manually, select **IP Settings** to set the **DHCP** setting to **Off**, and then enter the projector's **IP Address**, **Subnet Mask**, and **Gateway Address** as necessary.
- If you want to connect the projector to the network using IPv6, select **IPv6 Settings** to set the **IPv6** setting to **On**, and then set the **Auto Configuration** and **Use Temporary Address** settings as necessary.

10 To prevent the SSID or IP address from being displayed on the LAN standby screen and Home screen, set the **SSID Display** setting or the **IP Address Display** setting to **Off**.

11 When you finish selecting settings, select **Complete** and follow the on-screen instructions to save your settings and exit the menus.

> If no **Web Control Password** has been set, a screen prompting you to set a password is displayed before you can save the settings. Follow the on-screen instructions to set the password.

The wireless network settings are complete when you see the correct IP address on the LAN standby screen.

When you have finished making wireless settings for your projector, you need to select the wireless network on your computer. Then start the network software to send images to your projector through a wireless network.

Related Links

- "Network Menu - Wireless LAN Menu" p.91

Selecting Wireless Network Settings in Windows

Before connecting to the projector, select the correct wireless network on your computer.

1 To access your wireless utility software, click the network icon on the Windows taskbar.

2 When connecting in Advanced connection mode, select the network name (SSID) of the network the projector is connecting to.

3 Click **Connect**.

Selecting Wireless Network Settings in Mac

Before connecting to the projector, select the correct wireless network in Mac.

1. Click the Wi-Fi icon on the menu bar at the top of the screen.
2. When connecting in Advanced connection mode, make sure Wi-Fi is turned on and select the network name (SSID) of the network the projector is connecting to.

Setting Up Wireless Network Security

You can set up security for your projector to use on a wireless network. Set up one of the following security options to match the settings used on your network:

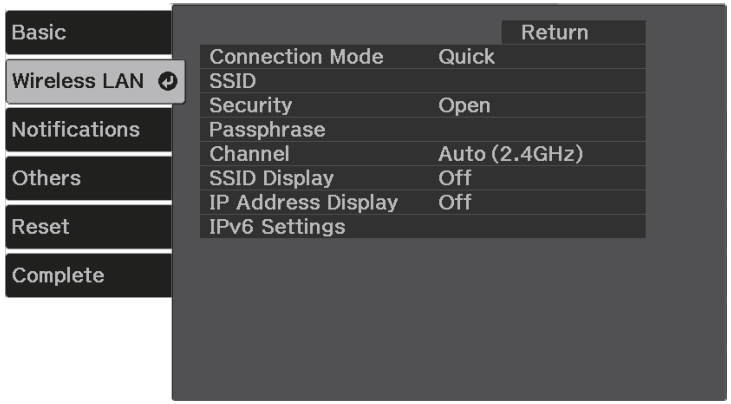
- WPA2-PSK security *
- WPA3-PSK security **
- WPA2/WPA3-PSK security **

* Available only for the Quick connection mode.

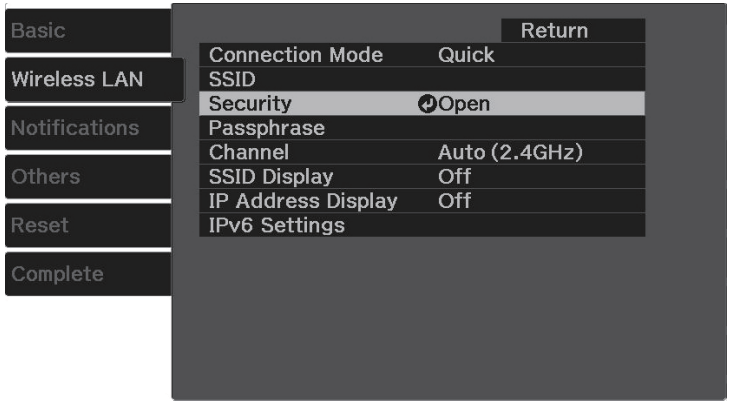
** Available only for the Advanced connection mode.

Contact your network administrator for guidance on entering the correct information.

1. Press the button, select the **Network** menu, and press [Enter].
2. Select **Network Configuration** and press [Enter].
3. Select the **Wireless LAN** menu and press [Enter].



4. Select the **Security** setting and press [Enter].



5. Select the security settings to match your network settings.
   - **WPA2-PSK**
   - **WPA3-PSK**
   - **WPA2/WPA3-PSK**

6 Select **Passphrase**, press [Enter], and enter a passphrase from 8 to 63 characters long. To enter more than 32 characters, use your Web browser.

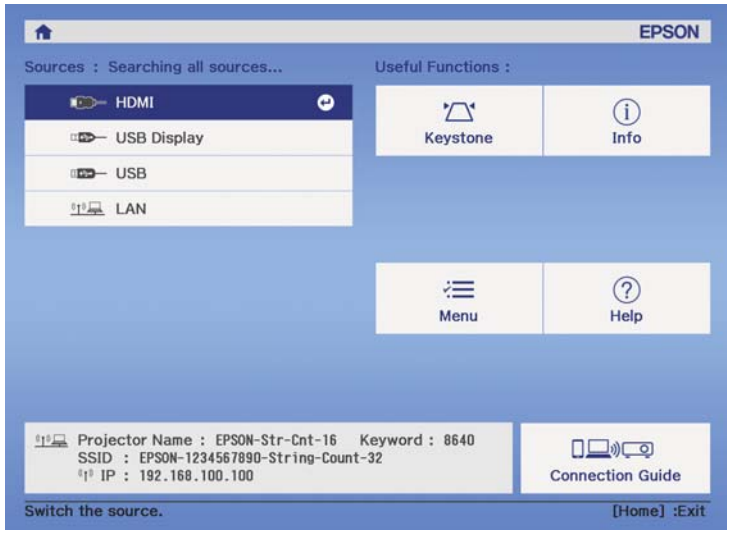
7 Select **Complete** and follow the on-screen instructions to save your settings and exit the menus.

Using a QR Code to Connect a Mobile Device

After selecting the wireless network settings for your projector, you can display a QR code on the screen and use it to connect a mobile device using the Epson iProjection (iOS/Android) app.

- Make sure you have installed the latest version of Epson iProjection on your device.
- You can download Epson iProjection for free from the App Store or Google Play. Any fees incurred when communicating with the App Store or Google Play are the responsibility of the customer.
- When using Epson iProjection in Quick connection mode, we recommend making security settings.

1 Press the home button on the remote control.
The Home screen is displayed.



2 Select **Connection Guide** > Android/iOS > **Next** on the Home screen.
The QR code is displayed on the projected surface.

- If you do not see the QR code, set the **Display LAN Info.** setting to **Text & QR Code** in the projector's **Network** menu.
  ☛ **Network** > **Network Configuration** > **Basic** > **Display LAN Info.**
- To hide the QR code, press back.

3 Start Epson iProjection on your mobile device.

4 Read the projected QR code using Epson iProjection to connect it to the projector.

> To correctly read the QR code, make sure you face the screen squarely and closely enough so that the projected code fits into the guide of the mobile device's QR code reader. If you are too far from the screen, the code may not be read.

When a connection is established, select **Contents** menu from ☰, and then select the file you want to project.

You can use your projector's PC Free feature whenever you connect a USB device that contains compatible presentation files. This lets you quickly and easily display a presentation and control it using the projector's remote control.

Supported PC Free File Types

You can project these types of files using the projector's PC Free feature.

- For best results, place your files on media that is formatted in FAT16/32.
- If you have trouble projecting from media formatted for non-Windows file systems, try formatting the media for Windows instead.
- Projection is not guaranteed for all file types in the following table.

File contents	File type (extension)	Details
Image	.jpg	Make sure the file is not: • CMYK format • JPEG 2000 • Above 8192 × 8192 resolution
	.bmp	Make sure the file is not: • Above 1280 × 800 resolution
	.gif	Make sure the file is not: • Above 1280 × 800 resolution • Animated • Interlaced
	.png	Make sure the file is not: • Above 1280 × 800 resolution * • Interlaced
Movie	.avi	Supports only AVI 1.0. Make sure the file is not: • Saved with a video codec other than Motion JPEG • Saved with an audio codec other than PCM or ADPCM • Above 1280 × 720 resolution • Larger than 2 GB

* When you use a projector with a resolution of Full HD, you can project a file with a maximum resolution of 1920 × 1080.

Precautions on PC Free Projection

Note the following precautions when using PC Free features.

- You cannot use a USB key for PC Free features.
- Do not disconnect the USB storage device while it is being accessed; otherwise, PC Free may not operate correctly.
- You may not be able to use the security features on certain USB storage devices with PC Free features.
- When connecting a USB device that includes an AC adapter, connect the AC adapter to an electrical outlet when you use the device with your projector.
- Some commercially available USB card readers may not be compatible with the projector.
- The projector can recognize up to 5 cards inserted into the connected card reader at one time.
- You cannot correct keystone distortion while projecting in PC Free, so correct the image shape before you begin your presentation.
- You can use the following functions while projecting in PC Free.
  - Freeze
  - A/V Mute
  - Zoom

Related Links

- "Stopping Video Action Temporarily" p.64

Starting a PC Free Slide Show

After connecting a USB device to the projector, you can switch to the USB input source and start your slide show.

You can change the PC Free operation options or add special effects by highlighting **Option** at the bottom of the screen and pressing [Enter].

1 Press the button on the remote control to switch to the USB source.

The PC Free file list screen is displayed.

- If the Select Drive screen is displayed, press the arrow buttons to select the drive and press [Enter].
- To display images on the other USB drive, highlight **Select Drive** at the top of the file list screen and press [Enter].

2 Do one of the following to locate your files:

- If you need to display files inside a subfolder on your device, press the arrow buttons to highlight the folder and press [Enter].
- To move back up a folder level on your device, highlight **Back to Top** and press [Enter].

3 Do one of the following:

- To display an individual image, press the arrow buttons to highlight the image and press [Enter]. (Press the ↩ button to return to the file list screen.)
- To display a slide show of all the images in a folder, press the arrow buttons to highlight the **Slideshow** option at the bottom of the screen and press [Enter].

- You can change the image switching time by highlighting **Option** at the bottom of the screen and pressing [Enter].
- If any file names are longer than the display area or include unsupported symbols, the file names may be shortened or changed only on the screen display.

4 While projecting, use the following commands to control the display:

- To rotate a displayed image, press the up or down arrow button.
- To move to the next or previous image, press the left or right arrow button.

5 To stop the display, follow the on-screen instructions or press the ↩ button.

You return to the file list screen.

6 Turn off the USB device, if necessary, and then disconnect the device from the projector.

Starting a PC Free Movie Presentation

After connecting a USB device to the projector, you can switch to the USB input source and start your movie.

You can change the PC Free operation options by highlighting **Option** at the bottom of the screen and pressing [Enter].

1 Press the ⏻ button on the remote control to switch to the USB source.

The PC Free file list screen is displayed.

- If the Select Drive screen is displayed, press the arrow buttons to select the drive and press [Enter].
- To display movie files on the other USB drive, highlight **Select Drive** at the top of the file list screen and press [Enter].

2 Do one of the following to locate your files:

- If you need to display files inside a subfolder on your device, press the arrow buttons to highlight the folder and press [Enter].
- To move back up a folder level on your device, highlight **Back to Top** and press [Enter].

3 To play back a movie, press the arrow buttons to highlight the file and press [Enter].

- If any file names are longer than the display area or include unsupported symbols, the file names may be shortened or changed only on the screen display.
- If you want to play back all the movies in a folder in sequence, select the **Slideshow** option at the bottom of the screen.

4 To stop movie playback, press the button, highlight **Exit**, and press [Enter].

You return to the file list screen.

5 Turn off the USB device, if necessary, and then disconnect the device from the projector.

- "PC Free Display Options" p.60
- "Connecting to a USB Device" p.25

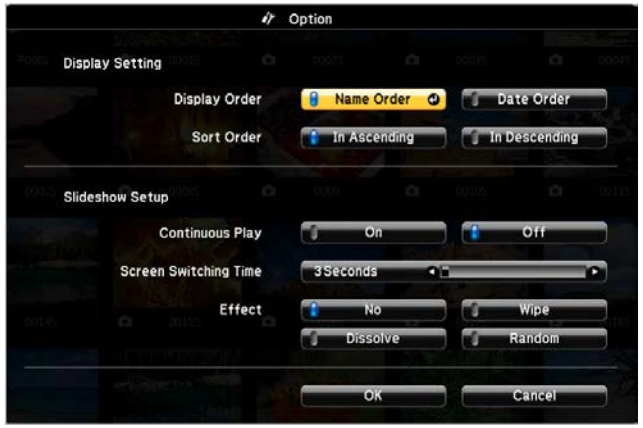
PC Free Display Options

You can select these display options when using PC Free. To access this screen, highlight **Option** at the bottom of the PC Free file list screen and press [Enter].

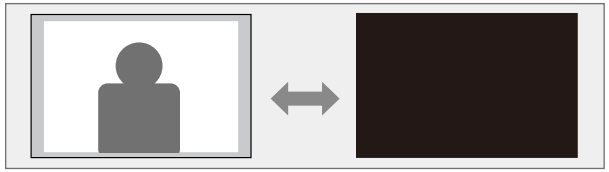


Setting	Options	Description
Display Order	Name Order	Displays files in name order
	Date Order	Displays files in date order
Sort Order	In Ascending	Sorts files in first-to-last order
	In Descending	Sorts files in last-to-first order
Continuous Play	On	Displays a slide show continuously
	Off	Displays a slide show once
Screen Switching Time	No	Does not display the next file automatically
	1 Second to 60 Seconds	Displays files for the selected time and switches to the next file automatically; high resolution images may switch at a slightly slower rate

Setting	Options	Description
Effect	No	No effect
	Wipe	Transitions between images using a wipe effect
	Dissolve	Transitions between images using a dissolve effect
	Random	Transitions between images using a random variety of effects

Shutting Off the Image and Sound Temporarily (A/V Mute)

You can temporarily turn off the projected image and sound. Any sound or video action continues to run, however, so you cannot resume projection at the point that you stopped it.



If you want to display an image such as a company logo or picture when the button is pressed, you can select the screen displayed in the **A/V Mute** setting in the projector's **Settings** menu.

☛ **Settings** > **Display** > **A/V Mute**

1 Press the button on the remote control.

The projected image and sound are interrupted.

2 To turn the image and sound back on, press again.

- The projector's power automatically turns off 30 minutes after A/V Mute is enabled. You can disable this feature.

  ☛ **Settings** > **Operation** > **A/V Mute Timer**
- The lamp is still operating during A/V Mute, so the lamp hours continue to accumulate.

Related Links

- "Projector Feature Settings - Settings Menu" p.87

Turning Off the Sound Temporarily (Mute)

You can temporarily turn off the sound.

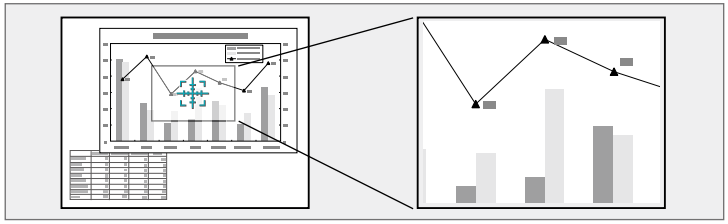
1. Press the button on the remote control.
2. To turn the sound back on, press again.

Stopping Video Action Temporarily

You can temporarily stop the action in a video or computer presentation and keep the current image on the screen. Any sound or video action continues to run, however, so you cannot resume projection at the point that you stopped it.

1. Press the Freeze button on the remote control to stop the video action.
2. To restart the video action in progress, press Freeze again.

You can zoom into an area of the projected image and enlarge it on the screen.



1. Press the button on the remote control.
   You see a crosshair on the screen indicating the center of the zoom area.

2. Use the following buttons on the remote control to adjust the zoomed image:
   - Use the arrow buttons to position the crosshair in the image area you want to zoom into. To move the crosshair diagonally, press any pair of adjacent arrow buttons at the same time.
   - Press the button repeatedly to zoom into the image area. Press and hold the button to zoom in more quickly.
   - To pan around the zoomed image area, use the arrow buttons.
   - To zoom out of the image, press the button.
   - To return to the original image size, press .

   The enlarged image is projected and the enlargement ratio is displayed on the screen.

You can enlarge the selected area to between one to four times in 25 incremental steps.

When projecting images from an Epson document camera using a USB connection, you can enlarge the selected area from one to eight times its size in 57 incremental steps.

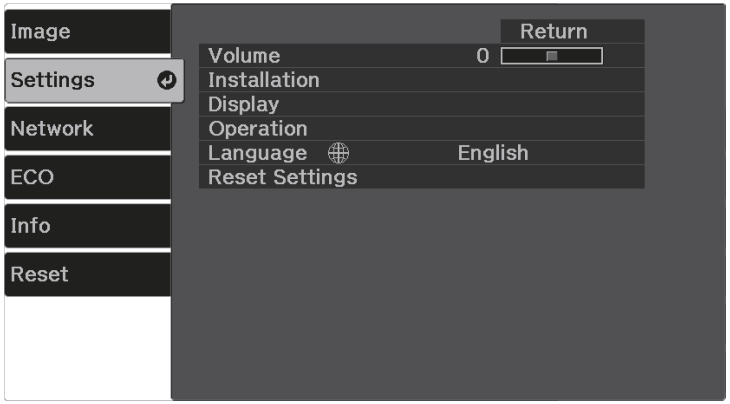
Saving a User's Logo Image

You can save an image on the projector and display it whenever the projector turns on. You can also display the image when the projector is not receiving an input signal. This image is called the user's logo screen.

You can select a photo, graphic, or company logo as the user's logo, which is useful in identifying the projector's owner to help deter theft. You can prevent changes to the user's logo by setting up password protection.

- If **User's Logo Protection** in the **Password Protection** setting is set to **On**, set to **Off** before saving the user's logo.
- When you copy the menu settings from one projector to another using the batch setup feature, user's logo is also copied. Do not register the information that you do not want to share between multiple projectors as a user's logo.
- You cannot save content that is protected by HDCP.

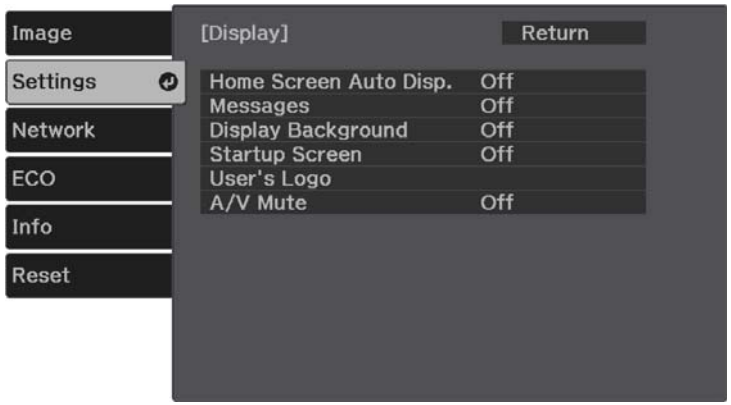
1. Display the image you want to project as the user's logo.
2. Press the button on the remote control.
3. Select the **Settings** menu and press [Enter].



4. Select **Display** > **User's Logo** > **Start Setting**, and press [Enter].
   You see a prompt asking if you want to use the displayed image as a user's logo.

   Adjustments such as Keystone, Zoom, or Aspect are temporarily canceled when you select **User's Logo**.

5. Select **Yes** and press [Enter].
6. Check the displayed image, and then select **Yes** to save it as the user's logo.
   The user's logo is overwritten and a completion message is displayed.
7. Press to exit the message screen.
8. Select when you want to display the User's Logo screen:



- To display it whenever there is no input signal, select **Display Background** and set it to **Logo**.
- To display it whenever you turn the projector on, select **Startup Screen** and set it to **On**.

- To display it whenever you press the button, select **A/V Mute** and set it to **Logo**.

> To prevent anyone from changing the User's Logo settings without first entering a password, set the **User's Logo Protection** setting to **On** in the **Password Protection** setting menu and set the password.

- "Selecting Password Security Types" p.70

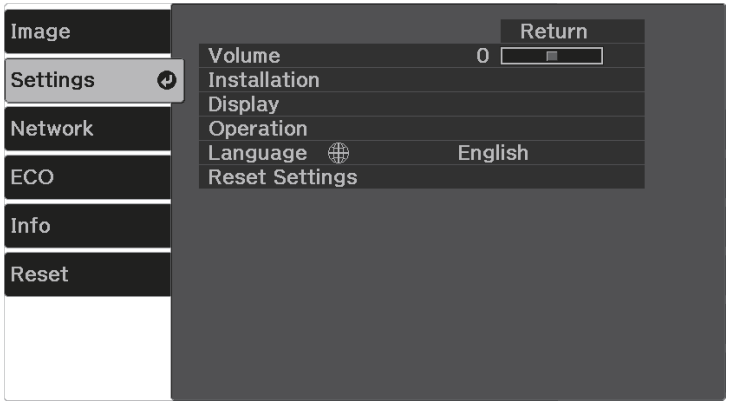
Saving a User Pattern

There are four types of patterns pre-registered in the projector, such as ruled lines and grid patterns. You can project these patterns to aid in presentations using the **Pattern Display** settings.

You can also save the image that is currently being projected as a User Pattern.

Once you save a User Pattern, the pattern cannot be returned to the factory default.

1. Project the image you want to save as the User Pattern.
2. Press the button on the remote control.
3. Select the **Settings** menu and press [Enter].



4. Select **Installation** > **Pattern** > **User Pattern**, and press [Enter].
   You see a prompt asking if you want to use the displayed image as a User Pattern.

- Adjustments such as Keystone, Zoom, or Aspect are temporarily cancelled when you select **User Pattern**.
- You cannot save digital images protected by HDCP technology as a User Pattern.

5. Select **Yes** and press [Enter].
6. Press [Enter].
   A message prompting you to save the projected image as a User Pattern is displayed.
7. Select **Yes** and press [Enter].
   A completion message is displayed.
8. Press [Enter].
9. Select **Pattern Type** and set it to **User Pattern**.
10. Press .
11. Select **Pattern Display** and press [Enter].
    The saved image is projected.

You can secure your projector to deter theft or prevent unintended use by setting up the following security features:

- Password security to prevent people who do not know the password from using the projector, and prevent changes to the startup screen and other settings.

  This acts as an anti-theft function as the projector cannot be used even if it is stolen, and you can limit who can use the projector.
- Security cabling to physically secure the projector in place.

- "Password Security Types" p.69
- "Installing a Security Cable" p.71

Password Security Types

You can set up the following types of password security using one shared password:

- **Power On Protection** prevents anyone from using the projector without first entering a password. When plugging the power cord and turning on the projector at first time, you must enter the correct password. This also applies to **Direct Power On** and **Auto Power On**.
- **User's Logo Protection** prevents anyone from changing the custom screen displayed when the projector turns on, when no signal is being input, or when you use the A/V Mute feature. The custom screen discourages theft by identifying the projector's owner.
- **Network Protection** prevents anyone from changing the projector's **Network** settings.

Related Links

- "Setting a Password" p.69
- "Selecting Password Security Types" p.70
- "Entering a Password to Use the Projector" p.71

Setting a Password

For the first time you use the projector, you must set a password.

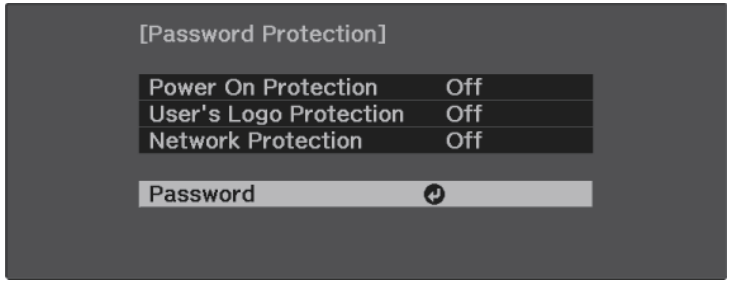
No password is set by default. You must set a password.

1. Hold down the Freeze button on the remote control for about five seconds.

   You see the Password Protection setting menu.

   - If no password has been set, a screen prompting you to set a password is displayed before you can view the **Password Protection** setting menu.
   - If **Password Protection** is already activated, you must enter the correct password to display the **Password Protection** setting menu.

2. Select **Password** and press [Enter].

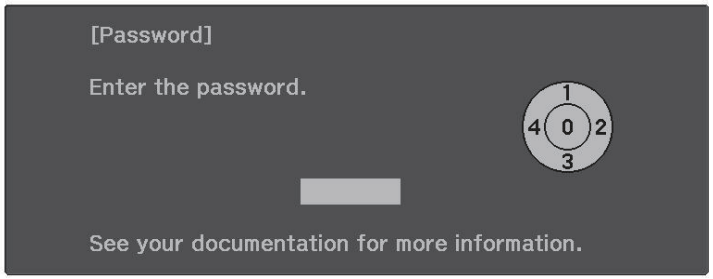


You see the prompt **Change the password?**.

3 Select **Yes** and press [Enter].

> If you select **No**, the Password Protection setting menu is displayed again.

4 Enter a four-digit password.
Highlight a number using the [Enter] button and arrow buttons, and then press [Enter] to select it. To select numbers from 5 to 9, press the button.



The password displays as **** as it is entered. A confirmation prompt is displayed when you enter the fourth digit.

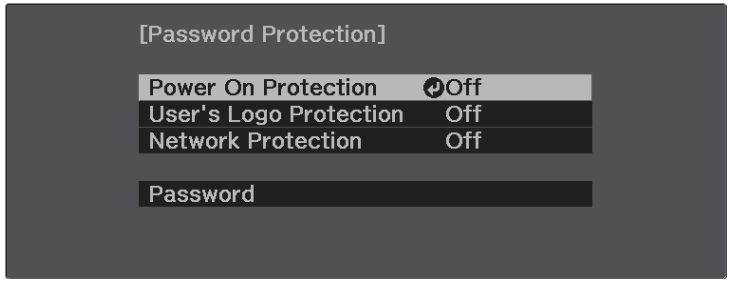
5 Enter the password again.
You see the message **Password accepted**. If you enter the password incorrectly, a message is displayed prompting you to re-enter the password.

6 Press to return to the menu.

7 Make a note of the password and keep it in a safe place.

Selecting Password Security Types

After setting a password, you see this menu, allowing you to select the password security types you want to use.



If you do not see this menu, hold down the Freeze button on the remote control for five seconds until the menu appears.

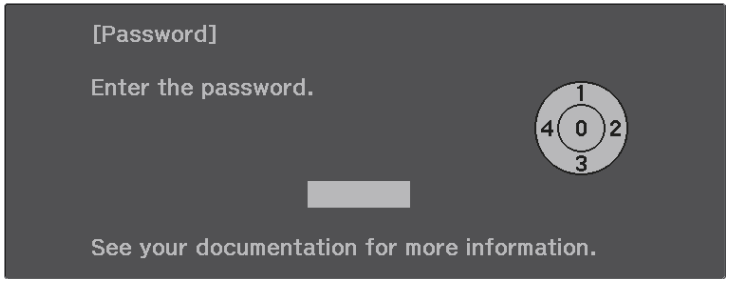
- To prevent unauthorized use of the projector, select **On** as the **Power On Protection** setting.
- To prevent changes to the User's Logo screen or related display settings, select **On** as the **User's Logo Protection** setting.
- To prevent changes to network settings, select **On** as the **Network Protection** setting.

You can attach the password protect sticker to the projector as an additional theft deterrent.

> Be sure to keep the remote control in a safe place; if you lose it, you will not be able to enter the password.

Entering a Password to Use the Projector

When the password screen is displayed, enter the correct password.



1. Enter the password using the [Enter] button and arrow buttons on the remote control.

   To select numbers from 5 to 9, press the button.

   The password screen closes.

2. If the password is incorrect, you see a message and a prompt to try again. Enter the correct password to proceed.

Attention

- If an incorrect password is entered five times in succession, the message **The projector's operation will be locked.** is displayed for approximately 5 minutes, and the projector switches to standby mode. If this happens, disconnect the power plug from the electrical outlet, reinsert it, and turn the projector back on. The projector displays the password entry screen again so that you can enter the correct password.
- If you have forgotten the password, make a note of the " **Request Code**: xxxxx" number that appears on the screen and contact Epson for help.
- If you continue to repeat the above operation and input the wrong password 30 times in succession, the message **The projector's operation will be locked. Contact Epson as described in your documentation.** is displayed and the projector does not accept any more password entries. Contact Epson for help.

Installing a Security Cable

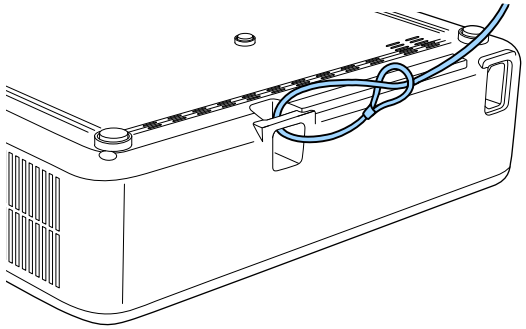
You can install the security cable on the projector to deter theft.

- Use the security slot on the projector to attach a Kensington Microsaver Security system.

For more details on the Microsaver Security System, visit the Kensington Web site.

https://www.kensington.com/

- Use the security cable attachment point on the projector to attach a wire cable and secure it to a room fixture or heavy furniture.



You can use a commercially available theft-prevention wire lock. See the documentation supplied with the wire lock for locking instructions.

Monitoring and Controlling the Projector

Check these sections to monitor and control the projector over a network.

Related Links

- "Epson Projector Management" p.74
- "Controlling a Networked Projector Using a Web Browser" p.75
- "Setting Up Projector Network E-Mail Alerts" p.79
- "Setting Up Monitoring Using SNMP" p.81

Epson Projector Management software (Windows only) lets you monitor and control your projector through the network. See the *Epson Projector Management Operation Guide* for instructions.

You can download Epson Projector Management from the following Web site.

epson.sn

The authentication method when registering projectors varies depending on the version of the Epson Projector Management software you are using. For the best results, we recommend that you use the latest version of the Epson Projector Management software.

Once you have connected your projector to your network, you can select projector settings and control projection using a compatible Web browser. This lets you access the projector remotely.

- Make sure the computer and projector are connected to the network. When projecting images using a wireless LAN, connect in **Advanced** connection mode.
- You can use the following Web browsers.
  - Microsoft Edge (Windows)
  - Safari (Mac, iOS)
  - Chrome (Android)
- While using the Web browser, do not connect using a proxy server. You cannot select all of the projector menu settings or control all projector functions using a Web browser.
- If you set **Standby Mode** to **Communication On**, you can use a Web browser to select settings and control projection even if the projector is in standby mode (when the power is off).

  ☛ **ECO** > **Standby Mode**

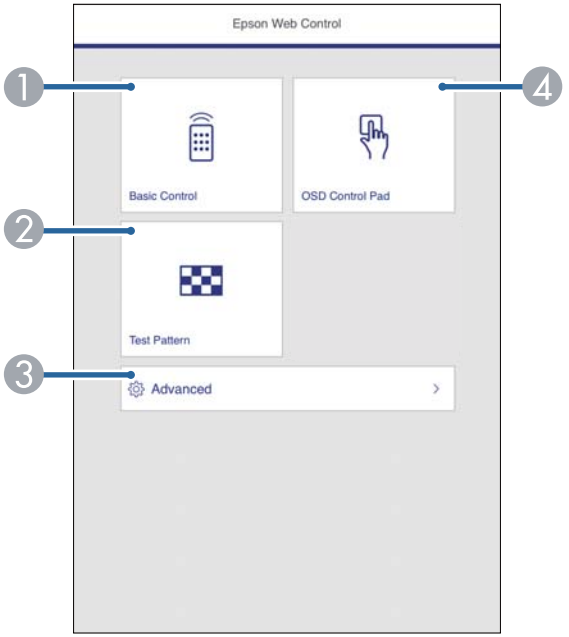
1 Make sure the projector is turned on.

2 Make sure your computer or device is connected to the same network as the projector.

3 Start your Web browser on the computer or device.

4 Go to the **Epson Web Control** screen by entering the projector's IP address into the browser's address box. When entering an IPv6 address, wrap the address with [and].

You see the **Epson Web Control** screen.



1. Controls the projector remotely.
2. Displays a test pattern.
3. Sets detailed projector settings.
4. Operates the projector's menu settings with your finger or mouse.

You can also check the projector's log files by entering "https://<projector's IP address>/WebControl/logs/" into your browser's URL bar when you set **Log Save Destination** to **USB and Internal Memory** in the projector's **Settings** menu.

☛ **Settings** > **Operation** > **Advanced** > **Log Save Destination**

5 Select the option corresponding to the projector function you want to control.

You may need to log in to access some of the options on the **Epson Web Control** screen. Set the following passwords first.

- To access the **Basic Control** option, you need to log in using **EPSONREMOTE** as the user name and your **Remote Password**. (No password is set by default.)

  Set **Basic Control** to **On** in the projector's **Network** menu, and then set the password.

  ☛ **Network** > **Network Configuration** > **Others** > **Basic Control**

- To access other options and save settings, you need to log in using **EPSONWEB** as the user name and your **Web Control Password**. (No password is set by default.)

  Set the password in the projector's **Network** menu.

  ☛ **Network** > **Network Configuration** > **Basic** > **Web Control Password**

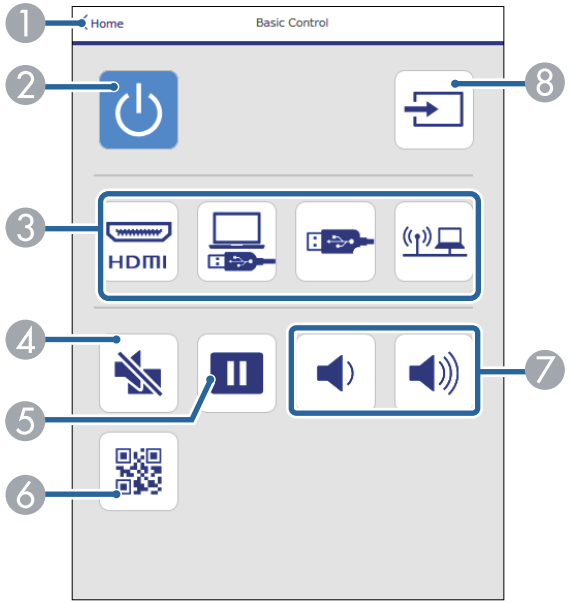
Web Control Options

Basic Control

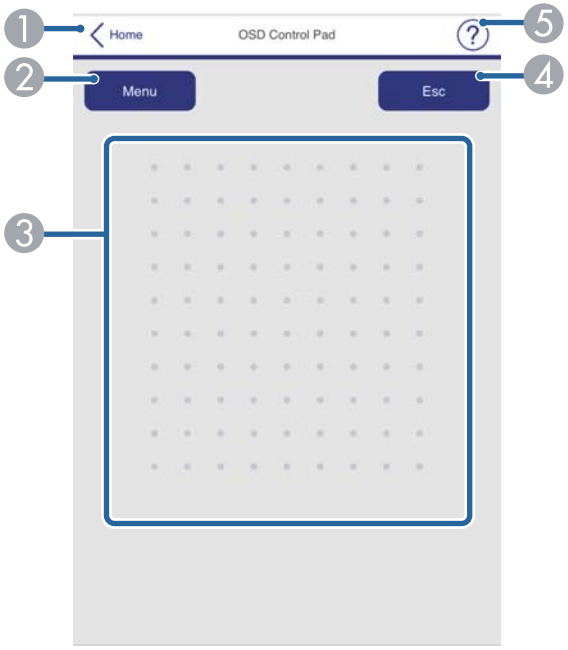
Options on the **Basic Control** screen allow you to select the input source and control the projector.



1. Returns to the **Epson Web Control** screen.
2. Turns the projector on or off.
3. Selects the input source.
4. Turns the video and audio on or off temporarily.
5. Pauses or resumes images.
6. Displays the QR code.
7. Adjusts the speaker volume.
8. Searches for sources.

OSD Control Pad

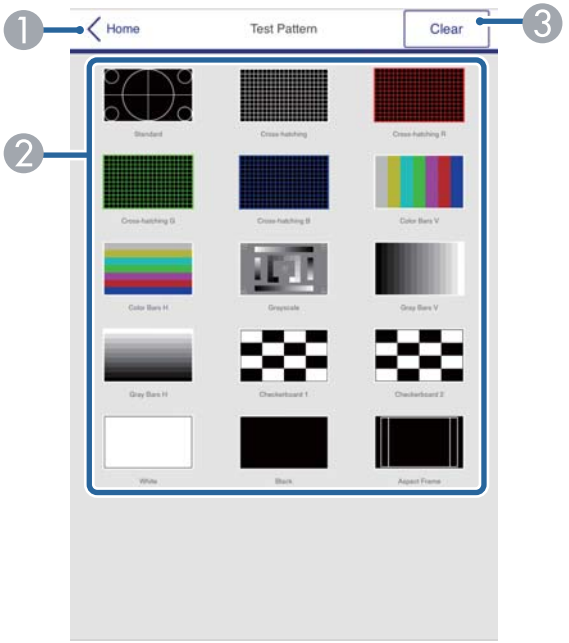
Options on the **OSD Control Pad** screen allow you to display the projector's setting menus and select them moving your finger or mouse on the pad.



1. Returns to the Epson Web Control screen.
2. Displays the projector's setting menus.
3. Use your finger or mouse to navigate the menus.
4. Returns to the previous menu.
5. Displays help topics.

Test Pattern

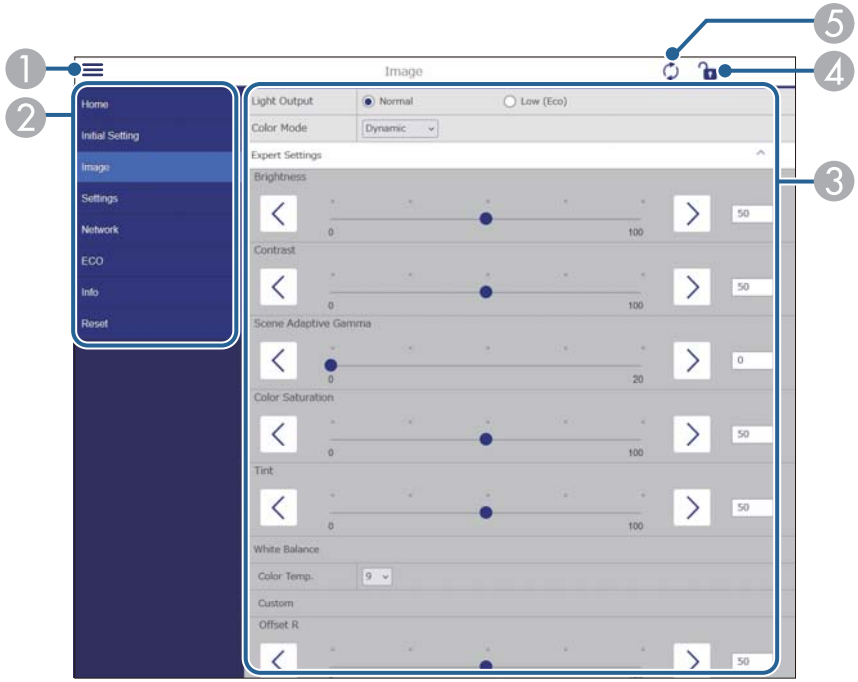
The **Test Pattern** screen displays the available test patterns and allow you to select to project it.



1. Returns to the **Epson Web Control** screen.
2. Displays available test patterns; select to project a test pattern.
3. Turns off test pattern display.

Advanced

The **Advanced** screen allow you to select the projector's settings.



1. Opens the menus.
2. Displays the menu name you selected.
3. Specifies the projector settings. (The available settings vary depending on your projector model.)
4. Locks/unlocks the projector settings.
5. Updates the projector settings.

You cannot change the following settings using Epson Web Control.

- **HDMI Link**
- **Image Shift**
- **User's Logo**
- **HDMI EQ Setting**
- **Language**
- **Search Access Point**

You can select the following settings only with Epson Web Control.

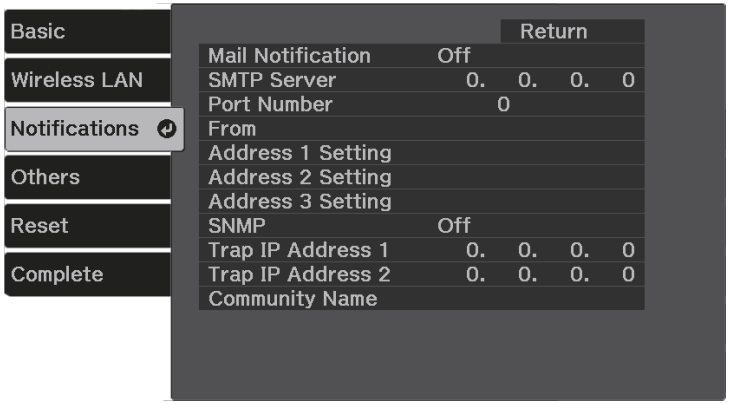
- Monitor Password (up to 16 alphanumeric characters)
- IPv6 Settings (manual)
- HTTP port (port number used for Web Control except for 80 [default], 843, 3620, 3621, 3625, 3629, 4352, 4649, 5357, 10000, 10001, 41794)

You can set up the projector to send you an e-mail alert over the network if there is a problem with the projector.

If you set the **Standby Mode** setting to **Communication On**, you can receive the e-mail alerts even if the projector is in standby mode (when the power is off).

☛ **ECO** > **Standby Mode**

1. Press the button on the remote control, select the **Network** menu, and press [Enter].
2. Select **Network Configuration** and press [Enter].
3. Select the **Notifications** menu and press [Enter].



4. Set the **Mail Notification** setting to **On**.
5. Enter the IP address for the **SMTP Server** option.

> Do not use "127.x.x.x" (where x is a number from 0 to 255) for the **SMTP Server**.

6. Select a number for the SMTP server **Port Number**, from 0 to 65535 (default is 25).
7. Enter the e-mail address to be indicated as the sender in **From**.
8. Choose an address field, enter the e-mail address, and select the alerts you want to receive. Repeat for up to three addresses.

> Your e-mail address can be up to 64 alphanumeric characters long. To enter more than 32 characters, use your Web browser.

9. When you finish selecting settings, select **Complete** and follow the on-screen instructions to save your settings and exit the menus.

> If a critical problem causes a projector to shut down, you may not receive an e-mail alert.

Related Links

- "Network Projector E-mail Alert Messages" p.79
- "Network Menu - Notifications Menu" p.93

Network Projector E-mail Alert Messages

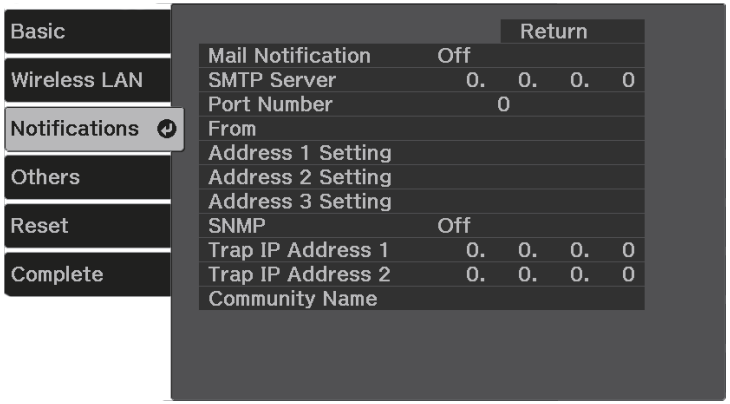
When a problem occurs with a projector on the network, and you selected to receive e-mail alerts, you receive an e-mail containing the following information:

- The email address set in **From** as the mail sender
- **Epson Projector** in the subject line
- The name of the projector experiencing a problem

- The IP address of the affected projector
- Detailed information about the problem

Network administrators can install SNMP (Simple Network Management Protocol) software on network computers so they can monitor projectors. If your network uses this software, you can set up the projector for SNMP monitoring.

1. Press the button on the remote control, select the **Network** menu, and press [Enter].
2. Select **Network Configuration** and press [Enter].
3. Select the **Notifications** menu and press [Enter].



4. Set the **SNMP** setting to **On**.
5. Enter up to two IP addresses to receive SNMP notifications as the **Trap IP Address 1** and **Trap IP Address 2** settings, using 0 to 255 for each address field.

> Do not use these addresses: 224.0.0.0 through 255.255.255.255. This projector supports SNMP agent version 1 (SNMPv1).

6. Enter the SNMP **Community Name** up to 32 alphanumeric characters long.
7. When you finish selecting settings, select **Complete** and follow the on-screen instructions to save your settings and exit the menus.

Adjusting the Menu Settings

Follow the instructions in these sections to access the projector menu system and change projector settings.

Related Links

- "Copying Menu Settings Between Projectors (Batch Setup)" p.101

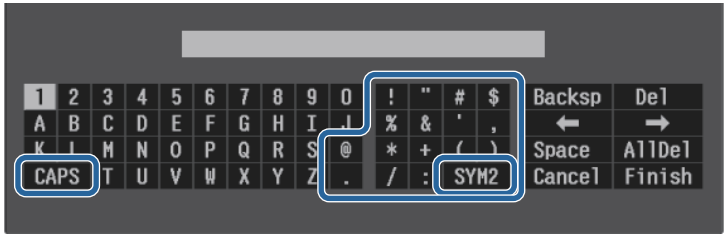
You can use the projector's menus to adjust the settings that control how your projector works. The projector displays the menus on the screen.

1. Press the button on the remote control.
   You see the menu screen displaying the **Image** menu settings.

2. Press the up or down arrow button to move through the menus listed on the left. The settings for each menu are displayed on the right.
3. To change settings in the displayed menu, press [Enter].
4. Press the up or down arrow button to move through the settings.
5. Change the settings using the buttons listed on the bottom of the menu screens.
6. To return all the menu settings to their default values, select **Reset**.
7. When you finish changing settings on a menu, press .
8. Press or to exit the menus.

You can use the displayed keyboard to enter numbers and characters.

1 Use the arrow buttons on the remote control to highlight the number or character you want to enter and press the [Enter] button.



Each time you select the CAPS key, the characters change between upper case and lower case. Each time you select the SYM1/2 key, the symbols enclosed by the frame change.

2 After entering the text, select Finish on the keyboard to confirm your entries. Select Cancel to cancel entering text.

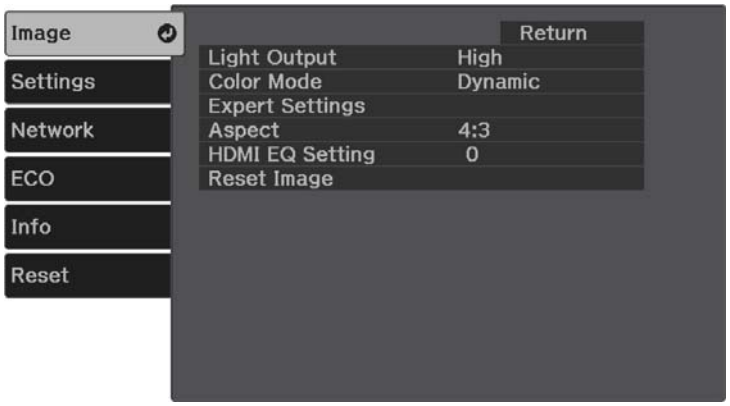
Available Text Using the Displayed Keyboard

You can enter the following text when using the displayed keyboard.

Text type	Details
Numbers	0123456789
Alphabet	ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz
Symbols	! " # $ % & ' ( ) * + , - . / : ; < = > ? @ [\ ] ^ _ ` { | } ~

Settings on the **Image** menu let you adjust the quality of your image for the input source you are currently using.



Setting	Options	Description
Light Output	High Low (Eco)	Adjusts the brightness for the light source.
Color Mode	See the list of available color modes	Adjusts the vividness of image colors for various image types and environments.
Expert Settings	Brightness	Lightens or darkens the overall image. **Brightness**: lightens or darkens the overall image. **Contrast**: adjusts the difference between light and dark areas of the image. **Scene Adaptive Gamma**: adjusts the coloring according to the scene, and obtains a more vivid image. Select a large number to enhance contrast.
	Color	Adjusts the intensity of the image colors. **Color Saturation**: adjusts the intensity of the image colors. **Tint**: adjusts the balance of green to magenta tones in the image. **White Balance**: **Color Temp.** sets the color temperature according to the color mode you selected. Higher values tint the image blue and lower values tint the image red. **Customized** adjusts the individual R (red), G (green), and B (blue) components of the offset and gain.
	Sharpness	Adjusts the sharpness or softness of image details.
Aspect	See the list of available aspect ratios.	Sets the aspect ratio (width-to-height ratio) for the input source.
HDMI EQ Setting	—	Adjusts the HDMI input signal level depending on the devices connected to the HDMI port. If there is a lot of interference in the image, or if a problem such as no image being projected occurs, change the setting. If no images are displayed using a thumb-sized media streaming device, select **1**.
Reset Image	—	Resets all adjustment values on the **Image** menu for the selected color mode to their default settings. Adjustment values for the following item(s) are not reset: • **HDMI EQ Setting**

The **Brightness** setting does not affect lamp brightness. To change the lamp brightness mode, use the **Light Output** setting.

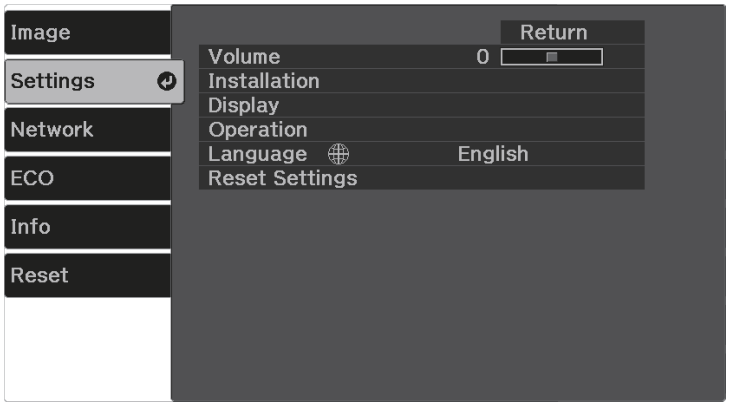
Options on the **Settings** menu let you customize various projector features.



Setting	Options	Description
Volume	-	Adjusts the volume of the projector's speaker system.
Installation	Keystone	**H/V-Keystone**: select to manually correct horizontal and vertical sides. **Quick Corner**: select to correct image shape and alignment using an on-screen display.
	Zoom	Adjusts the image size.
	Image Shift	Shifts the image position horizontally and vertically. This feature is not available if the **Zoom** option is set to the widest setting.
	Projection	Selects the way the projector faces the screen so the image is oriented correctly.
	Pattern	Selects various pattern display options. **Attention** If a pattern is displayed for a long time, a residual image may be visible in projected images. **Pattern Display**: lets you display the selected pattern type on the screen to aid in presentation. **Pattern Type**: select from Patterns 1 to 4 or **User Pattern**. Patterns 1 to 4 display patterns pre-registered in the projector, such as ruled lines or grid patterns. **User Pattern**: captures a projected screen and saves it as a pattern for display. **Test Pattern**: displays a test pattern to assist in focusing and zooming the image and correcting image shape (press the button to cancel pattern display).
	Screen	**Screen Type**: Sets the aspect ratio of the screen to fit the image into the projection area. This setting is unavailable when using one of the following input sources: • USB • USB Display • LAN **Screen Position**: Shifts the image position horizontally and vertically. This feature is not available if you set 16:10 for the **Screen Type**.

Setting	Options	Description
Display	Home Screen Auto Disp.	Select whether or not to display the Home screen automatically when there is no input signal when turning on the projector.
	Messages	Set to **On** to display messages such as color mode name, aspect ratio, or high temperature warning on your projected image. Set to **Off** if you do not want to display messages.
	Display Background	Sets the screen color or logo to display when no signal is received.
	Startup Screen	Set to **On** to display the User's Logo when the projector starts up.
	User's Logo	Creates a screen that the projector displays to identify itself and enhance security.
	A/V Mute	Sets the screen color or logo to display when A/V Mute is turned on.

Setting	Options	Description
Operation	HDMI Link	**Device Connections**: lists the devices connected to the HDMI ports. **HDMI Link**: enables or disables the HDMI Link features. **Audio Out Device**: selects whether to output audio from the internal speakers or a connected audio/video system. **Power On Link**: controls what happens when you turn on the projector or connected device. • **Bidirectional**: automatically turns on the connected device when you turn on the projector, and vice versa. • **Device -> PJ**: automatically turns on the projector when you turn on the connected device. • **PJ -> Device**: automatically turns on the connected device when you turn on the projector. **Power Off Link**: controls whether connected devices are turned off when you turn off the projector.
	Sleep Mode	Automatically turns off the projector after an interval of inactivity (when **On**).
	Sleep Mode Timer	Sets the interval for **Sleep Mode**.
	A/V Mute Timer	Automatically turns off the projector after 30 minutes if **A/V Mute** is enabled (when **On**).
	Standby Mode	Set to **Communication On** to allow the projector to be monitored and controlled over a network when the projector is in standby mode.

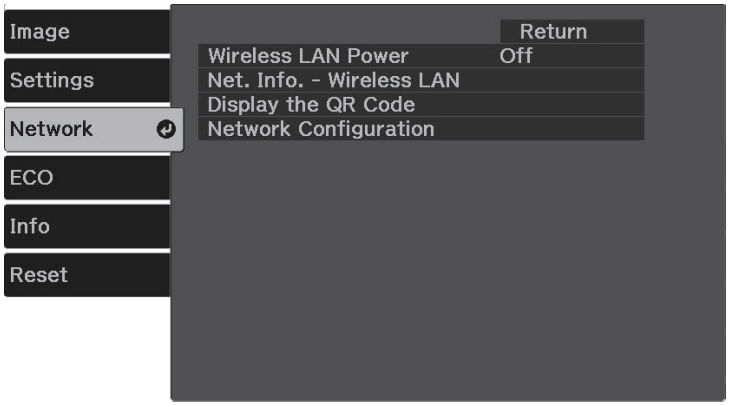
Setting	Options	Description
	Direct Power On	Lets you turn on the projector by plugging it in without pressing the power button.
	Auto Power On	Select the image source from which you want to automatically start projection. When the projector detects the input signal from the selected image source, it projects automatically in standby mode. The following image sources are available for this feature: • **HDMI** • **USB Display**
	High Altitude Mode	Regulates the projector's operating temperature at altitudes above 1500 m.
	Auto Source Search	Set to **On** to detect the input signal automatically and project images when there is no input signal.
	Indicators	Set to **Off** to turn off the indicator lights on the projector except when an error or warning occurs.
	Advanced	**Log Save Destination**: sets the location in which to save error and operation log files. **Batch Setup Range**: select **All** to copy all of the projector menu settings using the batch setup feature. Select **Limited**, if you do not want to copy the following settings: • **Password Protection** settings • **Network** menu settings

Setting	Options	Description
Language	Various languages available	Select the language for projector menu and message displays.
Reset Settings	—	Resets all adjustment values on the **Settings** menu to their default settings, except for the following: • **Zoom** • **Image Shift** • **Projection** • **Screen** • **Audio Out Device** • **Power On Link** • **Power Off Link** • **Standby Mode** • **High Altitude Mode** • **Auto Source Search** • **Language**

When you set **User's Logo Protection** to **On** in the **Password Protection** screen, you cannot change settings related to user's logo display (**Display Background**, **Startup Screen**, **A/V Mute** in the **Display** setting). Set **User's Logo Protection** to **Off** first.

Settings on the **Network** menu let you view network information and set up the projector for controlling over a network.

When you set **Network Protection** to **On** in the **Password Protection** screen, you cannot change the network settings. Set **Network Protection** to **Off** first.



If no **Web Control Password** has been set, a screen prompting you to set a password is displayed before you can save network settings. Follow the on-screen instructions to set the password.

Setting	Options	Description
Wireless LAN Power	On Off	Configures your wireless LAN settings. Select **On** to project images via a wireless LAN. If you do not want to connect via wireless LAN, turn it off to prevent unauthorized access by others.

Setting	Options	Description
Net. Info. - Wireless LAN	Connection Mode Wireless LAN Sys. Antenna Level Projector Name SSID DHCP IP Address Subnet Mask Gateway Address MAC Address Region Code IPv6	Displays wireless network status and details. Available when you have set **Wireless LAN Power** to **On**.
Display the QR Code	—	Displays a QR code for connecting with iOS or Android devices using the Epson iProjection app.
Network Configuration	To additional network menus	Configures your network settings.

Once you have connected your projector to your network, you can select projector settings and control projection using a compatible Web browser. This allows you to access the projector remotely.

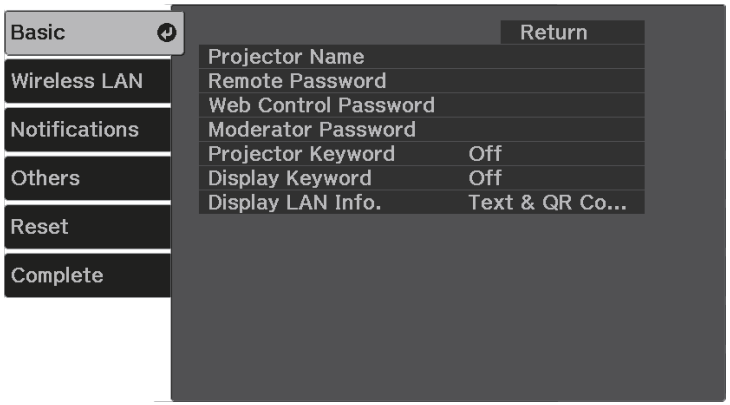
Network Menu - Basic Menu

Settings on the **Basic** menu let you select the basic network settings.

☛ **Network** > **Network Configuration** > **Basic**

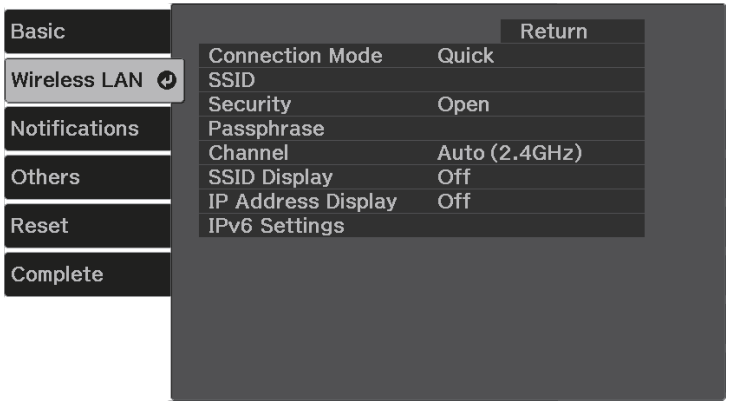


Setting	Options	Description
Projector Name	Up to 16 alphanumeric characters (do not use " * + , / : ; < = > ? [\ ] ` | spaces)	Enter a name to identify the projector over the network.
Remote Password	Up to 32 alphanumeric characters (do not use * : spaces)	Enter a password to access the projector using **Basic Control** in **Epson Web Control**. (The user name is **EPSONREMOTE**. No password is set by default.)
Web Control Password	Up to 32 alphanumeric characters (do not use * : spaces)	Enter a password for accessing the projector over the Web. (The user name is **EPSONWEB**. No password is set by default.)
Moderator Password	Four-digit number	Enter a password for accessing the projector as a moderator using Epson iProjection. (No password is set by default.)
Projector Keyword	On Off	Set to **On** to enable a security password to prevent access to the projector by anyone not in the same room as the projector. You must enter a displayed, randomized keyword from a computer using Epson iProjection to access the projector and share the current screen.
Display Keyword	On Off	Set to **On** to display a projector keyword on the projected image when accessing the projector using Epson iProjection. Available when **Projector Keyword** is set to **On**.
Display LAN Info.	Text & QR Code Text	Set the display format for the projector's network information. By simply reading the QR code with Epson iProjection, you can connect the mobile device to the projector through a network. The default value is **Text & QR Code**.

Network Menu - Wireless LAN Menu

Settings on the **Wireless LAN** menu let you select the wireless LAN settings.

☛ **Network** > **Network Configuration** > **Wireless LAN**



Setting	Options	Description
Connection Mode		Select the type of wireless connection:
	Quick	**Quick**: lets you connect to multiple smartphones, tablets, or computers directly using wireless communication. When you select Quick connection mode, the projector acts as an easy access point. (We recommend limiting the number of devices to six or less to maintain the projection performance.)
	Advanced	**Advanced**: lets you connect to multiple smartphones, tablets, or computers over a wireless network access point.
Search Access Point	To Search View	Search for available wireless network access points in Advanced connection mode. Depending on the access point settings, they may not be displayed in the list.

Setting	Options	Description
SSID	Up to 32 alphanumeric characters	Sets the SSID (network name) of the wireless LAN system the projector is connecting to.
Security		Selects the type of security used on the wireless network. When setting security, follow the instructions from the administrator of the network system you want to connect to.
	Open	Security is not set.
	WPA2-PSK	Communication is performed using WPA2 security. Uses AES method for encryption. When establishing a connection from a computer to the projector, enter the value set in the passphrase.
	WPA3-PSK	Communication is performed using WPA3 security. Uses AES method for encryption. When establishing a connection from a computer to the projector, enter the value set in the passphrase.
	WPA2/WPA3-PSK	Connects in WPA2/WPA3 personal mode. Encryption method is selected automatically according to the access point settings. Set a passphrase which is the same for the access point.

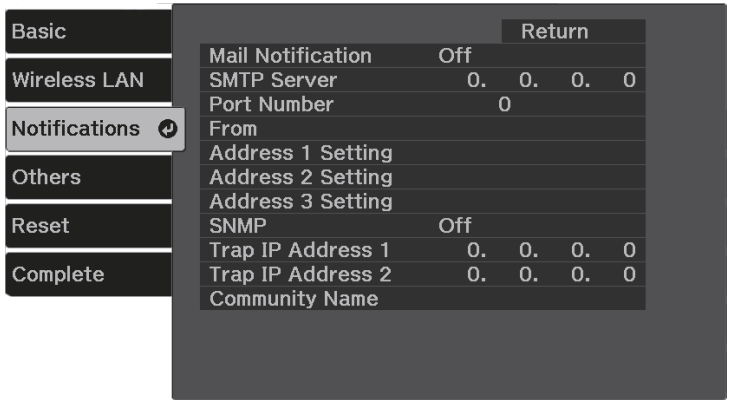
Setting	Options	Description
Passphrase	Various passphrases from 8 to 32 characters (when entering from a Web browser: various passphrases from 8 to 63 characters)	For **WPA2-PSK**, **WPA3-PSK** and **WPA2/WPA3-PSK** security, selects the pre-shared passphrase used on the network. When the passphrase is entered and the [Enter] button is pressed, the value is set and displayed as an asterisk (*). We recommend changing the passphrase periodically for security. If the network settings are initialized, it returns to the initial passphrase.
Channel	Various channels available	In Quick connection mode, selects the frequency band (channel) used by the wireless LAN.
IP Settings	DHCP IP Address Subnet Mask Gateway Address	**DHCP**: set to **On** if your network assigns addresses automatically; set to **Off** to manually enter the network's **IP Address**, **Subnet Mask**, and **Gateway Address** using 0 to 255 for each address field. Do not use these addresses: 0.0.0.0, 127.x.x.x, 192.0.2.x or 224.0.0.0 through 255.255.255.255 (where x is a number from 0 to 255) for IP Address, 255.255.255.255 or 0.0.0.0 through 254.255.255.255 for Subnet Mask, and 0.0.0.0, 127.x.x.x or 224.0.0.0 through 255.255.255.255 for Gateway Address.
SSID Display	On Off	Select whether to display the SSID on the network standby screen and Home screen.
IP Address Display	On Off	Select whether to display the IP address on the network standby screen and Home screen.

Setting	Options	Description
IPv6 Settings		Select the IPv6 settings if you want to connect the projector to the network using IPv6:
	IPv6	**IPv6**: set to **On** if you want to connect the projector to the network using IPv6. IPv6 is supported to monitor and control the projector over a network using Epson Web Control.
	Auto Configuration	**Auto Configuration**: set to **On** to assign addresses automatically according to the Router Advertisement.
	Use Temporary Address	**Use Temporary Address**: set to **On** if you want to use a temporary IPv6 address.

Network Menu - Notifications Menu

Settings on the **Notifications** menu let you receive an email notification if a problem or warning occurs in the projector.

☛ **Network** > **Network Configuration** > **Notifications**



Setting	Options	Description
Mail Notification	On Off	Set to **On** to send an email to the preset addresses when a problem or warning occurs with a projector.
SMTP Server	IP address	Enter the IP address for the projector's SMTP server using 0 to 255 for each address field.
Port Number	0 to 65535 (default is 25)	Select a number for the SMTP server Port Number.
From	Up to 32 alphanumeric characters Up to 64 alphanumeric characters from the Web browser (do not use " ( ) , : ; < > [\ ] spaces)	Enter the email address of the sender.
Address 1 Setting Address 2 Setting Address 3 Setting		Enter the e-mail address, and select the alerts you want to receive. Repeat for up to three addresses.
SNMP	On Off	Set to **On** to monitor the projector using SNMP. To monitor the projector, you need to install the SNMP manager program on your computer. SNMP should be managed by a network administrator.
Trap IP Address 1 Trap IP Address 2	IP address	Enter up to two IP addresses to receive SNMP notifications, using 0 to 255 for each address field. Do not use these addresses: 127.x.x.x or 224.0.0.0 through 255.255.255.255 (where x is a number from 0 to 255).

Setting	Options	Description
Community Name	Up to 32 alphanumeric characters (do not use spaces and any symbols other than @)	Set the SNMP community name.

Network Menu - Others Menu

Settings on the **Others** menu let you select other network settings.

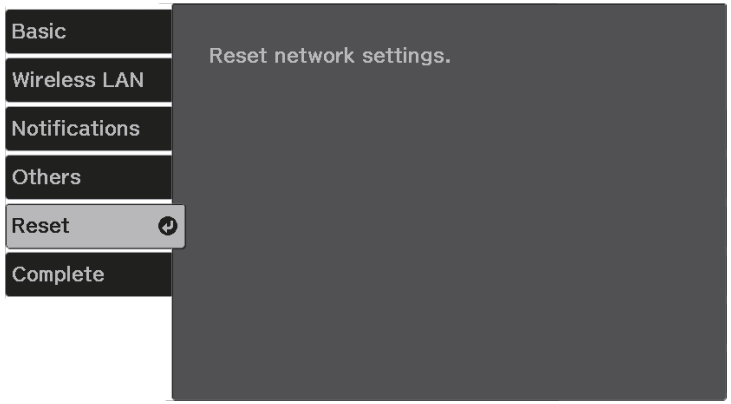
☛ **Network** > **Network Configuration** > **Others**

Setting	Options	Description
Command Communication	Protected Compatible	Selects the authentication method for command communication. Set to **Protected** when performing a digest authentication using **Web Control Password**. You need to install the latest version of the Epson Projector Management software. Set to **Compatible** when performing plain text authentication using the **Monitor Password** (up to 16 alphanumeric characters long). Select **Compatible** when monitoring projectors with a switcher and a system controller or using Epson Projector Management ver.5.30 or earlier.
Basic Control	On Off	Set to **On** to monitor and control the projector using **Basic Control** in **Epson Web Control**.
Message Broadcasting	On Off	Set to **On** to receive the message delivered by Epson Projector Management. See the *Epson Projector Management Operation Guide* for details.

Network Menu - Reset Menu

Settings on the **Reset** menu let you reset all of the network settings.

☛ **Network** > **Network Configuration** > **Reset**



Setting	Options	Description
Reset network settings.	—	Resets all network settings. **Attention** All of the passwords that have been set for the **Network** menu are also reset and you need to set them again. To prevent the passwords from being reset by unauthorized users, set **Network Protection** to **On** in the **Password Protection** menu.

Network Menu - Complete Menu

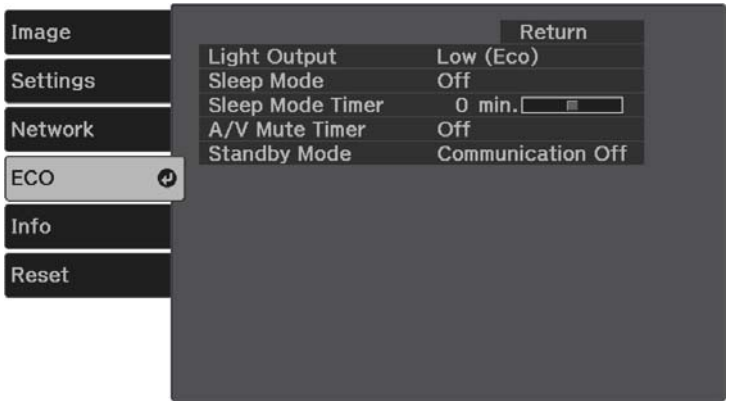
When you finish making network settings, select **Complete** and follow the on-screen instructions to save your settings.

☛ **Network** > **Network Configuration** > **Complete**

Setting	Options	Description
Save network settings.	—	Saves the network settings. Press [Enter] to save the network settings.

Settings on the **ECO** menu let you customize projector functions to save power.

When you select a power-saving setting, a leaf icon appears next to the menu item.

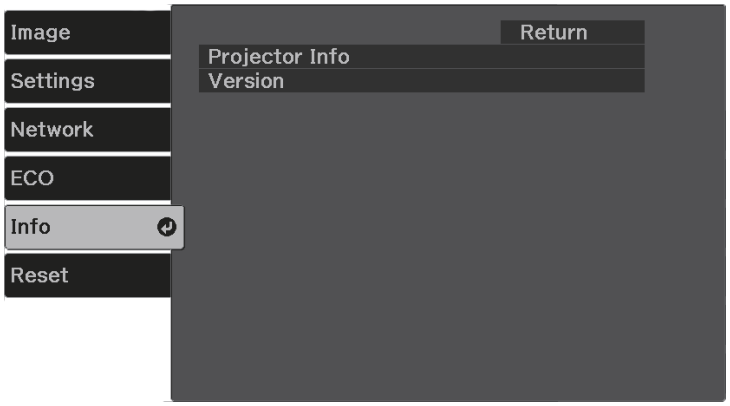


Setting	Options	Description
Light Output	High Low (Eco)	Selects the brightness mode of the projector lamp. You cannot select settings when you use your projector at high altitude or in locations subject to high temperatures. **High**: sets maximum lamp brightness. **Low (Eco)**: reduces lamp brightness and fan noise, and saves power and lamp life.
Sleep Mode	On Off	Automatically turns off the projector after an interval of inactivity (when **On**).
Sleep Mode Timer	1 to 30 minutes	Sets the interval for Sleep Mode.
A/V Mute Timer	On Off	Automatically turns off the projector after 30 minutes if **A/V Mute** is enabled (when **On**).

Setting	Options	Description
Standby Mode	Communication On Communication Off	**Communication On** indicates that the projector can be monitored over a network when the projector is in standby mode. Enable this setting to allow the following operations to occur when the projector is in standby mode: • Monitor and control the projector over a network

- When the **A/V Mute Timer** setting is enabled, the lamp uses less power when **A/V Mute** is activated.

You can display information about the projector and version by viewing the **Info** menu. However, you cannot change any settings in the menu.



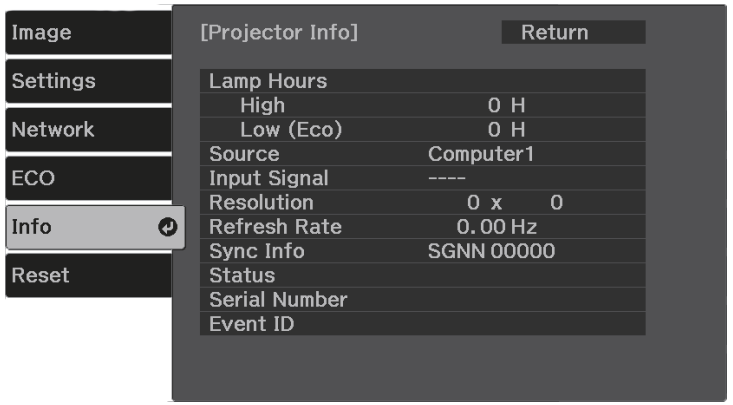
Information item	Options	Description
Projector Info	—	Displays the projector information.
Version	—	Displays the projector's firmware version.
Export Batch Settings	Yes No	Exports the projector's menu settings to a USB flash drive or a computer, allowing you to copy them to other projectors of the same model.
Import Batch Settings	Yes No	Imports menu settings that have been saved to a USB flash drive or a computer.

Related Links

- "Info Menu - Projector Info Menu" p.98

Info Menu - Projector Info Menu

You can display information about the projector and input sources by viewing the **Projector Info** menu in the projector's **Info** menu.



Information item	Description
Lamp Hours	Displays the number of hours (**H**) the lamp has been used in **High** and **Low (Eco)**.
Source	Displays the name of the port to which the current input source is connected.
Input Signal	Displays the input signal setting of the current input source.
Resolution	Displays the resolution of the current input source.
Refresh Rate	Displays the refresh rate of the current input source.
Sync Info	Displays information that may be needed by a service technician.
Status	Displays information about projector problems that may be needed by a service technician.
Serial Number	Displays the projector's serial number.

Information item	Description
Event ID	Displays the Event ID number corresponding to a network problem; see the list of Event ID codes.

Related Links

- "Event ID Code List" p.99

Event ID Code List

If you cannot resolve the problem, contact your network administrator or Epson for technical support.

Event ID code	Cause and solution
0432 0435	The network software did not start. Turn the projector off and then on again.
0433	Cannot display the transferred images. Restart the network software.
0434 0481 0482 0485	Unstable network communication. Check the network communication status, wait a few moments, and try connecting to the network again.
0483 04FE	The network software quit unexpectedly. Check the network communication status, then turn the projector off and then on again.
0484	Communication with computer was disconnected. Restart the network software.
0479 04FF	A projector system error has occurred. Turn the projector off and then on again.
0891	Cannot find an access point with the same SSID. Set your computer, access point, and projector to the same SSID.
0892	The WPA/WPA2/WPA3 authentication type does not match. Make sure the wireless network security settings are correct.
0893	The TKIP/AES encryption type does not match. Make sure the wireless network security settings are correct.
0894	Communication with an unauthorized access point was disconnected. Contact your network administrator.
0895	Communication with a connected device was disconnected. Check your device connection status.
0898	Failed to acquire DHCP. Make sure the DHCP server is operating correctly. If you are not using DHCP, set the **DHCP** setting to **Off** in the projector's **Network** menu.
0899	Other communication errors.

Projector Reset Options - Reset Menu

You can reset most of the projector settings to their default values using the **Reset All Config** option on the **Reset** menu.

Setting	Options	Description
Reset All Config	—	Resets most of the projector settings to their default values.

You cannot reset the following settings using the **Reset All Config** option:

- Zoom
- Image Shift
- Language
- Network menu items

After selecting the projector's menu settings for one projector, you can use the following methods to copy the settings to other projectors, as long as they are the same model.

- by using a USB flash drive
- by connecting a computer and projector using a USB cable

Menu settings such as the following are not copied to the other projector.

- **Lamp Hours** and **Status** from the **Projector Info** menu

- Perform batch setup before adjusting the image settings such as keystone distortion correction. Since image adjustment values are also copied to another projector, the adjustments you made before performing the batch setup are overwritten and the projected screen you adjusted may change.
- When copying the menu settings from one projector to another, user's logo is also copied. Do not register the information that you do not want to share between multiple projectors as a user's logo.
- Make sure **Batch Setup Range** is set to **Limited** if you do not want to copy the following settings:
  - **Password Protection** settings
  - **Network** menu settings (except for the **Notifications** menu and the **Others** menu)

  ☛ **Settings** > **Operation** > **Advanced** > **Batch Setup Range**

⚠ Caution

Epson takes no responsibility for batch setup failures and associated repair costs due to power outages, communication errors, or other problems that may cause such failures.

- "Transferring Settings From a Computer" p.102

Transferring Settings From a USB Flash Drive

You can copy menu settings from one projector to another of the same model using a USB flash drive.

- The USB flash drive must use a FAT16/32 format and not incorporate any security function. Delete any files on the drive before using it for batch setup or the settings may not be saved correctly.
- You can also use this batch setup method from the projector's menu.

1. Disconnect the power cord from the projector, and check that all of the projector's indicators have turned off.
2. Connect an empty USB flash drive directly to the projector's USB-A port.
3. Hold down the ⮌ button on the remote control and connect the power cord to the projector.
4. When all of the projector's indicators turn on, release the ⮌ button.

   The indicators start flashing and the batch setup file is written to the USB flash drive. When writing is finished, the projector turns off.

⚠ Caution

Do not disconnect the power cord or the USB flash drive from the projector while the file is being written. If the power cord or USB flash drive is disconnected, the projector may not start correctly.

5 Remove the USB flash drive.

> The file name for the batch setup file is PJCONFDATA.bin. If you need to change the file name, add text after PJCONFDATA using only alphanumeric characters. If you change the PJCONFDATA section of the file name, the projector may not be able to recognize the file correctly.

6 Disconnect the power cord from the projector to which you want to copy settings, and check that all of the projector's indicators have turned off.

7 Connect the USB flash drive containing the saved batch setup file to the projector's USB-A port.

8 Hold down the button on the remote control and connect the power cord to the projector.

9 When all of the projector's indicators turn on, release the button.

When all of the indicators start flashing, the settings are being written. When writing is finished, the projector turns off.

> **⚠ Caution**
> Do not disconnect the power cord or the USB flash drive from the projector while the file is being written. If the power cord or USB flash drive is disconnected, the projector may not start correctly.

10 Remove the USB flash drive.

Transferring Settings From a Computer

You can copy menu settings from one projector to another of the same model by connecting the computer and projector with a USB cable.

> - You can use this batch setup method with the following operating system versions:
>   - Windows 8.1 and later
>   - macOS 10.13.x and later
> - You can also use this batch setup method from the projector's menu.

1 Disconnect the power cord from the projector, and check that all of the projector's indicators have turned off.

2 Connect a USB cable to the computer's USB port and to the projector's USB-B port.

3 Hold down the button on the remote control and connect the power cord to the projector.

4 When all of the projector's indicators turn on, release the button.

The computer recognizes the projector as a removable disk.

5 Open the removable disk icon or folder, and save the batch setup file to the computer.

> The file name for the batch setup file is PJCONFDATA.bin. If you need to change the file name, add text after PJCONFDATA using only alphanumeric characters. If you change the PJCONFDATA section of the file name, the projector may not be able to recognize the file correctly.

6 Eject the USB device (Windows) or drag the removable disk icon to the Trash (Mac).

7 Disconnect the USB cable.

The projector turns off.

8. Disconnect the power cord from the projector to which you want to copy settings, and check that all of the projector's indicators have turned off.

9. Connect a USB cable to the computer's USB port and to the projector's USB-B port.

10. Hold down the button on the remote control and connect the power cord to the projector.

11. When all of the projector's indicators turn on, release the button.
The computer recognizes the projector as a removable disk.

12. Copy the batch setup file (PJCONFDATA.bin) that you saved to your computer to the top level folder of the removable disk.

> Do not copy any files or folders other than the batch setup file to the removable disk.

13. Eject the USB device (Windows) or drag the removable disk icon to the Trash (Mac).

14. Disconnect the USB cable.
When all of the indicators start flashing, the settings are being written. When writing is finished, the projector turns off.

> **Caution**
> Do not disconnect the power cord from the projector while the file is being written. If the power cord is disconnected, the projector may not start correctly.

Related Links

- "Batch Setup Error Notification" p.103

Batch Setup Error Notification

The projector's indicators notify you if an error occurs during a batch setup operation. Check the status of the projector's indicators and follow the instructions described in the table here.

Indicator status	Problem and solutions
Flashing orange	The batch setup file may be corrupt, or the USB flash drive or USB cable may not be connected correctly. Disconnect the USB flash drive or the USB cable, unplug and then plug in the projector's power cord, and then try again. If the problem persists, unplug the projector and contact Epson for help.

Maintaining the Projector

Follow the instructions in these sections to maintain your projector.

Related Links

- "Projector Maintenance" p.105
- "Cleaning the Lens" p.106
- "Cleaning the Projector Case" p.107
- "Cleaning the Air Vents " p.108

You may need to clean the projector's lens periodically, and clean the air vents to prevent the projector from overheating due to blocked ventilation.

The only part you should replace is the remote control batteries. If any other part needs replacing, contact Epson or an authorized Epson servicer.

⚠ Warning

Before cleaning any part of the projector, turn it off and unplug the power cord. Never open any cover on the projector, except as specifically explained in this manual. Dangerous electrical voltages in the projector can injure you severely.

Cleaning the Lens

Clean the projector's lens periodically, or whenever you notice dust or smudges on the surface.

- To remove dust or smudges, gently wipe the lens with clean and dry lens-cleaning paper.
- If the lens is dusty, blow off dust using a blower, and then wipe the lens.

⚠ Warning

- Before cleaning the lens, turn off the projector and unplug the power cord.
- Do not use any flammable gas sprays such as air dusters to blow off dust. The high heat generated by the projector may cause a fire.

Attention

- Do not wipe the lens right after you turn off the projector. Doing so could damage the lens.
- Do not use any harsh materials to clean the lens and do not subject the lens to any impacts; otherwise, it could be damaged.

Cleaning the Projector Case

Before cleaning the projector case, turn off the projector and unplug the power cord.

- To remove dust or dirt, use a soft, dry, lint-free cloth.
- To remove stubborn dirt, use a soft cloth moistened with water and mild soap. Do not spray liquid directly on the projector.

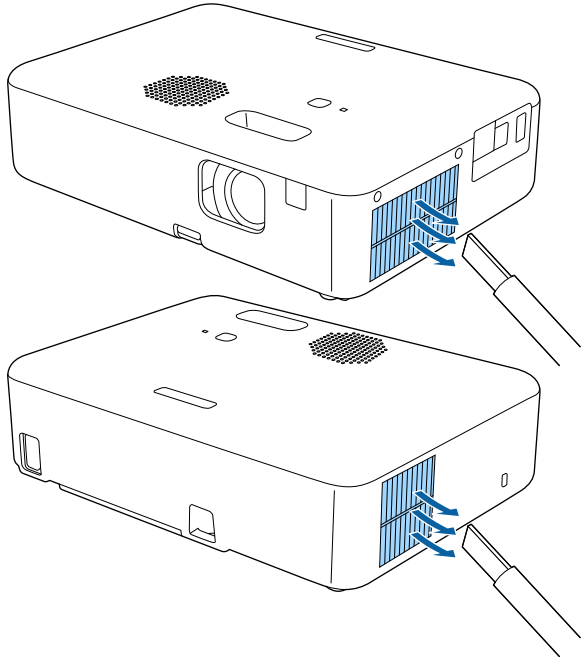
Attention

Do not use wax, alcohol, benzene, paint thinner, or other chemicals to clean the projector case. These can damage the case. Do not use canned air, or the gases may leave a flammable residue.

Cleaning the Air Vents

Clean the projector's air intake/exhaust vents periodically, or whenever you notice dust on the surface of the vents to prevent the projector from overheating due to blocked ventilation.

1. Turn off the projector and unplug the power cord.
2. Carefully remove the dust using a vacuum cleaner or a brush.



Solving Problems

Check the solutions in these sections if you have any problems using the projector.

Related Links

- "Projection Problems" p.110

- "Solving HDMI Link Problems" p.122
- "When the Message "It is time to replace the projector." is Displayed" p.123

If the projector is not working properly, turn it off, unplug it, and then plug it back in and turn it on.

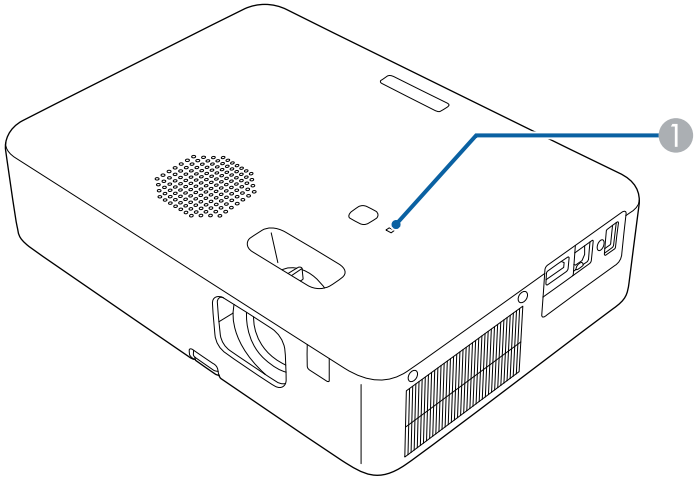
If this does not solve the problem, check the following:

- The indicators on the projector may indicate the problem.
- The projector's Help system can display information about common problems.
- The solutions in this manual can help you solve many problems.

If none of these solutions help, contact Epson for technical support.

The indicators on the projector indicate the projector status and let you know when a problem occurs. Check the status and color of the indicators and then refer to this table for a solution.

If the indicators display a pattern not listed in the table below, turn the projector off, unplug it, and contact Epson for help.



1 Status indicator

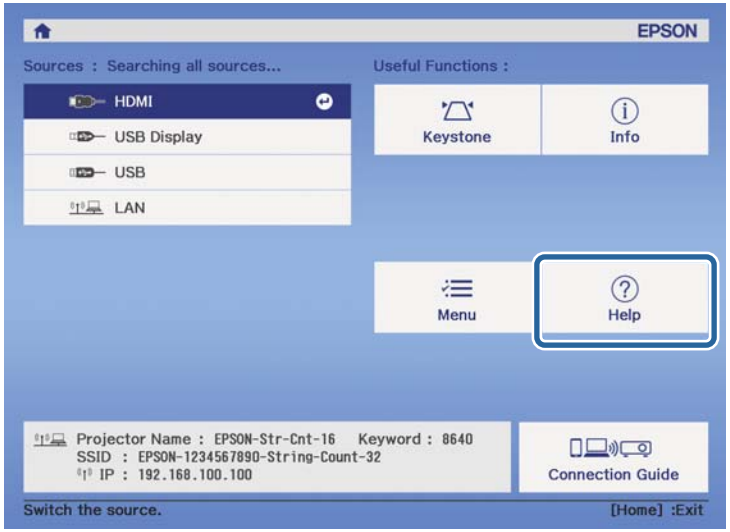
Projector status

Indicator status	Problem and solutions
Lit blue	Normal operation.
Flashing blue	Warming up, shutting down, or cooling down. When warming up, wait about 30 seconds for an image to appear. Remote control operations may be disabled when the indicator is flashing blue.
Off	Projector is in standby status. When you press the power button, projection starts.
Lit orange	Projector has overheated and turned off. Leave it turned off to cool down for 5 minutes. • Make sure that the air vents are not clogged with dust or obstructed by nearby objects. • Make sure the environmental temperature is not too hot. • If the problem persists, unplug the projector and contact Epson for help.
	Low air flow through the air filter. • Make sure that the air vents are not clogged with dust or obstructed by nearby objects. • Make sure the environmental temperature is not too hot. • If the problem persists, unplug the projector and contact Epson for help.
	Low air flow through the projector. • Make sure that the air vents are not clogged with dust or obstructed by nearby objects. • Make sure the environmental temperature is not too hot. • If the problem persists, unplug the projector and contact Epson for help.
Flashing orange	Lamp has a problem. Turn the projector off, unplug it, and contact Epson for help.
	A fan or sensor has a problem. Turn the projector off, unplug it, and contact Epson for help.

Indicator status	Problem and solutions
	Internal projector error. Turn the projector off, unplug it, and contact Epson for help.
	Power error (Ballast). Turn the projector off, unplug it, and contact Epson for help.

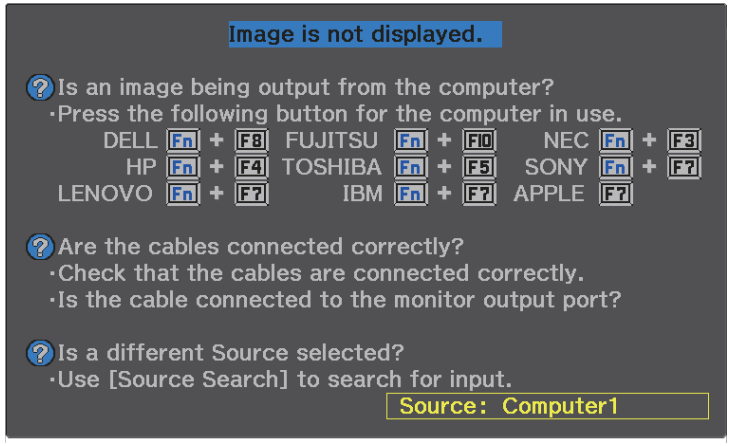
You can display information to help you solve common problems using the projector's Help system.

1. Turn on the projector.
2. Press the button on the remote control.
3. Select **Help** on the Home screen.



The Help menu is displayed.

4. Use the up and down arrow buttons to highlight the problem you want to solve.



5. Press [Enter] to view the solutions.
6. Perform one of the following actions when you are finished.
   - To select another problem to solve, press .
   - To exit the help system, press .

Check the solutions in these sections if the projector does not turn on when you press the power button or it turns off unexpectedly.

Solving Projector Power Problems

If the projector does not turn on when you press the power button, try the following steps until the problem is solved.

1. Check the following items.
   - If you are using the remote control, check the batteries of the remote control.
   - Make sure the power cord is securely connected to the projector and to a working electrical outlet.
2. Disconnect the cord and contact Epson for help.

Related Links

- "When the Projector Lamp does not Turn on" p.114

When the Projector Lamp does not Turn on

If the projector lamp does not turn on when you press the power button, the lamp may be broken.

Warning

- Do not swing or tilt the projector. Shards of glass may fall out and could cause an injury.
- If any shards of glass get into your eyes or mouth, contact a doctor immediately.

Solving Projector Shutdown Problems

If the projector turns off unexpectedly, try the following steps until the problem is solved.

1. Projectors may have entered sleep mode after a period of inactivity. Perform any operation to wake the projector. To turn off sleep mode, select **Off** as the **Sleep Mode** setting.
   ☛ **Settings** > **Operation** > **Sleep Mode**
2. If the projector turns off unexpectedly, the A/V mute timer may be enabled. To turn off the A/V mute timer, select **Off** as the **A/V Mute Timer** setting in the projector's **Settings** menu.
   ☛ **Settings** > **Operation** > **A/V Mute Timer**
3. When the status indicator is lit orange, the projector has overheated and turned off.

   The cooling fans may run in standby status depending on the projector settings. Also, when the projector wakes from standby status, the fans may cause an unexpected noise. This is not a malfunction.

- "Solving USB Display Problems" p.118

Solving Missing Image Problems

If no image is displayed, try the following steps until the problem is solved.

1 Check the projector's status:

- Press the button on the remote control to see if the image was temporarily turned off.
- Check the status indicator to confirm that the projector is in normal operating status.
- Press the projector's power button to wake it from standby or sleep mode. Also, check if the connected computer is in sleep mode or displaying a blank screen saver.

  ☛ **Settings** > **Operation** > **Sleep Mode**

2 Check the cable connection:

- Make sure all necessary cables are securely connected and the power is on for the projector.
- Connect the video source directly to the projector.
- Replace the HDMI cable with the shorter one.

3 Check the status of your video source:

- Turn on the connected video source, and press the play button to start a video, if necessary.
- Make sure the connected device meets the HDMI CEC standard. See the documentation supplied with the device for more information.
- If you are projecting from a laptop computer, make sure it is set up to display on an external monitor.

4 Check the following items:

- Turn off the projector and the connected video source, and then turn them back on.
- Set the CEC function for the connected device again and restart the device.
- Make sure the computer's display resolution does not exceed the projector's resolution and frequency limits. If necessary, select a different display resolution for your computer. (See your computer manual for details.)
- Resets all of the projector settings to their default values.

  ☛ **Reset** > **Reset All Config**

Adjusting an Image that is not Rectangular

If the projected image is not evenly rectangular, try the following steps until the problem is solved.

1. Place the projector directly in front of the center of the screen, facing it squarely, if possible.
2. Adjust the image shape using the **Keystone** settings.
   ☛ **Settings** > **Installation** > **Keystone** > **H/V-Keystone**
   ☛ **Settings** > **Installation** > **Keystone** > **Quick Corner**

Related Links

Adjusting a Fuzzy or Blurry Image

If the projected image is fuzzy or blurry, try the following steps until the problem is solved.

1. Adjust the image focus using the focus lever.
2. Check the following items:
   - Position the projector close enough to the screen.
   - Position the projector so the keystone adjustment angle is not so wide that it distorts the image.
3. Clean the projector's lens.

   To avoid condensation on the lens after bringing the projector in from a cold environment, let the projector warm up to room temperature before using it.
4. Adjust the **Sharpness** setting in the projector's **Image** menu to improve image quality.
   ☛ **Image** > **Expert Settings** > **Sharpness**
5. If you are projecting from a computer, use a lower resolution or select a resolution that matches the projector's native resolution.

Related Links

- "Focusing the Image Using the Focus Lever" p.42

Fixing Partial Image Problems

If only a partial computer image is displayed, try the following steps until the problem is solved.

1. If you zoomed into or out of the image using the **Zoom** setting, press the ⮌ button until the projector returns to a full display.
2. Make sure you selected the correct projection mode. You can select this using the **Projection** setting in the projector's **Settings** menu.
   ☛ **Settings** > **Installation** > **Projection**

3 Check your computer display settings to disable dual display and set the resolution within the projector's limits. (See your computer manual for details.)

- "Projector Feature Settings - Settings Menu" p.87

Adjusting an Image that Contains Noise or Static

If the projected image contains electronic interference (noise) or static, try the following steps until the problem is solved.

1 Check the cables connecting your video source to the projector. They should be:

- Separated from the power cord to prevent interference
- Securely connected at both ends
- Not connected to an extension cable

2 If you adjusted the image shape using the projector controls, try decreasing the **Sharpness** setting in the projector's **Image** menu to improve image quality.

☛ **Image** > **Expert Settings** > **Sharpness**

3 If you connected an extension power cable, try projecting without it to see if it caused interference in the signal.

4 Select a computer video resolution and refresh rate that are compatible with the projector.

- "Image Quality Settings - Image Menu" p.85

Adjusting a Flickering Image

If the projected screen flickers, try the following steps until the problem is solved.

1 If the screen flickers only when a video signal is input, try replacing the cable connecting the projector and video device, or try connecting the video device using Epson iProjection. If you connect your computer using a USB cable, try changing the connection method to HDMI.

2 If **Light Output** is set to **Low (Eco)**, change this to **High** and try projecting an image for about two hours to see if it still flickers.

3 Disconnect all the cables connecting the projector and video devices, confirm no signal is being input, and then rest all the projector settings by performing **Reset All Config** in the projector's **Reset** menu.

Related Links

- "Projector Setup Settings - ECO Menu" p.97
- "Projector Reset Options - Reset Menu" p.100

Adjusting an Image with Incorrect Brightness or Colors

If the projected image is too dark or bright, or the colors are incorrect, try the following steps until the problem is solved.

1 Try different color modes for your image and environment by selecting the **Color Mode** setting in the projector's **Image** menu.

2 Check your video source settings.

3 Adjust the available settings in the projector's **Image** menu for the current input source, such as **Brightness**, **Contrast**, **Tint**, and **Color Saturation**.

☛ **Image** > **Expert Settings** > **Brightness**

☛ **Image** > **Expert Settings** > **Color**

4 Make sure all the cables are securely connected to the projector and your video equipment. If you connected long cables, try connecting shorter cables.

5 Position the projector close enough to the screen.

Related Links

- "Image Quality Settings - Image Menu" p.85

Adjusting an Upside-down Image

If the projected image is upside-down, select the correct projection mode.

☛ **Settings** > **Installation** > **Projection**

Solving USB Display Problems

If no image appears or if the image appears incorrectly using the USB Display function, try the following steps until the problem is solved.

1 Disconnect the USB cable, and reconnect it.

2 Make sure the Epson USB Display software has been installed correctly.

Depending on your OS or computer settings, the software may not have been installed automatically. Download the latest software from the following Web site and install it.

epson.sn

3 For Mac, select the **USB Display** icon in the **Dock** folder. If the icon does not appear on the **Dock**, double-click **USB Display** in the **Applications** folder.

If you select **Exit** from the **USB Display** icon menu on the **Dock**, USB Display does not start automatically when you connect the USB cable.

4 If the mouse cursor flickers, select **Make the movement of the mouse pointer smooth** in the **Epson USB Display Settings** program on your computer.

5 Turn off the **Transfer layered window** setting in the **Epson USB Display Settings** program on your computer.

- If you change the computer resolution during projection, the performance and quality of the video may decline.
- For images projected with Windows Media Center, reduce the screen size from full screen mode.
- For images projected from applications using Windows DirectX, turn off DirectX functions.

If there is no sound or the volume is too low, try the following steps until the problem is solved.

1. Adjust the projector's volume settings using the or button on the remote control.
2. Check the cable connection between the projector and your video source.
3. Check the following settings on the projector:
   - Press the button on the remote control to resume video and audio if they were temporarily stopped.
   - Press the button on the remote control to unmute audio if it was muted.
4. Check the following settings on your video equipment:
   - Check your video source to make sure the volume is turned up and the audio output is set for the correct source.
   - Set the connected device to PCM output.
   - When you are connecting the projector to a Mac using an HDMI cable, make sure your Mac supports audio through the HDMI port.

Solving Remote Control Operation Problems

If the projector does not respond to remote control commands, try the following steps until the problem is solved.

If you lose the remote control, you can order another one from Epson.

1. Check that the remote control batteries are installed correctly and have power. If necessary, replace the batteries.
2. Check to see if a button on the remote control is stuck down, causing it to enter sleep mode. Release the button to wake the remote control up.
3. Make sure you are operating the remote control within the reception angle and range of the projector.
4. Make sure the projector is not warming up or shutting down.
5. Strong fluorescent lighting, direct sunlight, or infrared device signals may be interfering with the projector's remote receivers. Dim the lights or move the projector away from the sun or interfering equipment.

If you cannot enter or remember a password, try the following solutions:

1. If you have entered an incorrect password too many times and see a message displaying a request code, write down the code and contact Epson for help. Provide the request code and proof of ownership for assistance in unlocking the projector.

2. If you lose the remote control you cannot enter a password. Order a new one from Epson.

Attention

If you perform **Reset network settings.** in the projector's **Network** menu, all of the passwords that have been set for the **Network** menu are also reset and you need to set them again. To prevent the passwords from being reset by unauthorized users, set **Network Protection** to **On** in the **Password Protection** menu.

Solving HDMI Link Problems

If you cannot operate the connected devices using the HDMI Link features, try the following steps until the problem is solved.

1. Make sure the cable meets the HDMI CEC standard.
2. Make sure the connected device meets the HDMI CEC standard. See the documentation supplied with the device for more information.
3. Check if the device is available in the **Device Connections** list.
   If the device does not appear in the **Device Connections** list, it does not meet the HDMI CEC standards. Connect a different device.
   ☛ **Settings** > **Operation** > **HDMI Link** > **Device Connections**
4. Check that all cables required for HDMI Link are securely connected.
5. Make sure the connected devices are turned on and in standby status. See the documentation supplied with the device for more information.
6. If you connect a new device or change the connection, set the CEC function for the connected device again and restart the device.

When the Message "It is time to replace the projector." is Displayed

At the end of the projector lamp's life, the message "**It is time to replace the projector. See your documentation for more information.**" is displayed. Turn the projector off and consider replacing the projector even if the lamp continues to work.

⚠ Warning

- If you continue to use the projector after the lamp's life expires, the possibility that the lamp may explode increases.
- If the lamp breaks, note the following points:
  - Ventilate the area immediately.
  - Do not swing or tilt the projector. Shards of glass may fall out and could cause an injury.
  - If any shards of glass get into your eyes or mouth, contact a doctor immediately.

Mounts

Ceiling mount ELPMB23
Use when installing the projector on a ceiling.

Safety Wire Set ELPWR01
Use when connecting the projector to the installation mount to prevent the projector from falling down.

Ceiling pipe (450 mm) ELPFP13

Ceiling pipe (700 mm) ELPFP14
Use when installing the projector on a high ceiling.

Special expertise is required to suspend the projector from a ceiling. Contact Epson for help.

For Wireless Connection

Wireless LAN module ELPAP11
Use this to project images from a computer via a wireless communication.

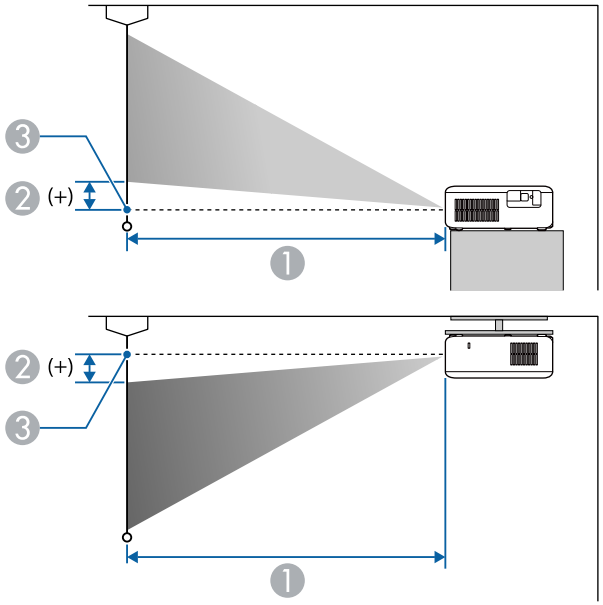
External Devices

Document Camera ELPDC21/ELPDC13/ELPDC07
Use when projecting image such as books, OHP documents, or slides.

Soft carrying case ELPKS69
Use this to carry the projector by hand.

Streaming Media Player ELPAP12
Use this streaming media player to watch online content.

Check the table here to determine how far to place the projector from the screen based on the size of the projected image.



1. Projection distance (cm)
2. Distance from the center of the lens to the base of the screen (or to the top of the screen, if suspended from a ceiling) (cm)
3. Center of lens

Supported Monitor Display Resolutions

The tables here list the compatible refresh rate and resolution for each compatible video display format.

HDMI Port Input Signals

Signal	Refresh rate (Hz)	Resolution (dots)
VGA	60	640 × 480
SVGA	60	800 × 600
XGA	60	1024 × 768
WXGA	60	1280 × 800
	60	1366 × 768
WXGA+	60	1440 × 900
WXGA++	60	1600 × 900
SXGA	60	1280 × 960
	60	1280 × 1024
SXGA+	60	1400 × 1050
WSXGA+	60	1680 × 1050
UXGA	60	1600 × 1200
1920 × 1080	50/60	1920 × 1080
SDTV (480i/480p)	59.94	720 × 480
SDTV (576i/576p)	50	720 × 576
HDTV (720p)	50/59.94/60	1280 × 720
HDTV (1080i)	50/59.94/60	1920 × 1080
HDTV (1080p)	23.98/24/29.97/30/50/59.94/60	1920 × 1080

Product name	CO-FH01/CO-FD01/CO-W01/CO-WX01/CO-WX02
Dimensions	295 (W) × 82 (H) × 211 (D) mm (not including raised section)
LCD panel size	**CO-FH01/CO-FD01**: 0.62" **CO-W01/CO-WX01/CO-WX02**: 0.59"
Display method	Poly-silicon TFT active matrix
Resolution	**CO-FH01/CO-FD01**: 2,073,600 pixels Full HD (1,920 (W) × 1,080 (H) dots) × 3 **CO-W01/CO-WX01/CO-WX02**: 1,024,000 pixels WXGA (1,280 (W) × 800 (H) dots) × 3
Focus adjustment	Manual
Zoom adjustment	1 to 1.35 (Digital Zoom)
Lamp	UHE lamp, 188 W
Lamp life	High Light Output mode: Up to 6,000 hours Low (Eco) Light Output mode: Up to 12,000 hours
Max. audio output	5 W
Speaker	1
Power supply	100-240V AC±10% 50/60Hz 2.9 - 1.3 A
Power consumption (100 to 120 V area)	Operating: 284 W
Power consumption (220 to 240 V area)	Operating: 270 W

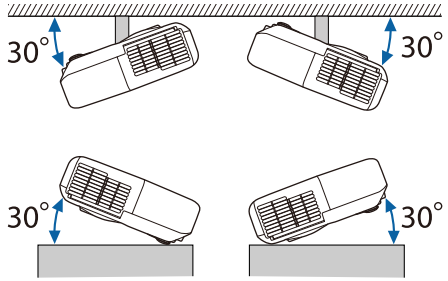
Standby power consumption	0.5 W
Operating altitude	Altitude 0 to 3,048 m
Operating temperature *	Altitude of 0 to 2,286 m: +5 to +40°C (No condensation) Altitude of 2,287 to 3,048 m: +5 to +35°C (Humidity of 20 to 80%, No condensation)
Storage temperature	-10 to +60°C (Humidity of 10 to 90%, No condensation)
Mass	Approx. 2.4 kg

* Lamp brightness automatically dims if the surrounding temperature gets too high. (Approximately 35°C at an altitude of 0 to 2,286 m, and approximately 30°C at an altitude of 2,287 to 3,048 m; however, this may vary depending on the surrounding environment.)

This product is also designed for IT power distribution system with phase-to-phase voltage 230V.

The rating label is attached on the bottom of the projector.

Angle of tilt



If you use the projector tilted at an angle of more than 30˚ it could be damaged and cause an accident.

The following table lists the meaning of the safety symbols labeled on the equipment.

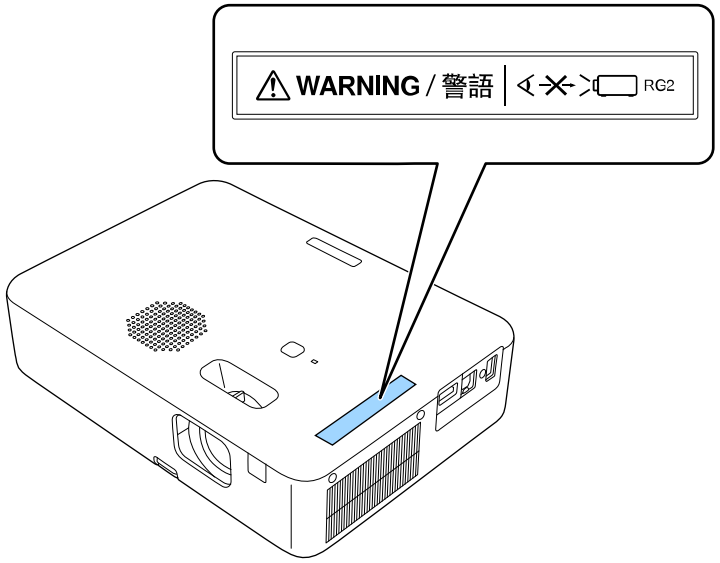
No.	Symbol mark	Approved standards	Description
❶		IEC60417 No. 5007	"ON" (power) To indicate connection to the mains.
❷		IEC60417 No. 5008	"OFF" (power) To indicate disconnection from the mains.
❸		IEC60417 No. 5009	Stand-by To identify the switch or switch position by means of which part of the equipment is switched on in order to bring it into the stand-by condition.
❹		ISO7000 No. 0434B, IEC3864-B3.1	Caution To identify general caution when using the product.
❺		IEC60417 No. 5041	Caution, hot surface To indicate that the marked item can be hot and should not be touched without taking care.
❻		IEC60417 No. 6042 ISO3864-B3.6	Caution, risk of electric shock To identify equipment that has risk of electric shock.
❼		IEC60417 No. 5957	For indoor use only To identify electrical equipment designed primarily for indoor use.

No.	Symbol mark	Approved standards	Description
❽		IEC60417 No. 5926	Polarity of d.c. power connector To identify the positive and negative connections (the polarity) on a piece of equipment to which a d.c. power supply may be connected.
❾		—	The same as No. 8.
❿		IEC60417 No. 5001B	Battery, general On battery powered equipment. To identify a device for instance a cover for the battery compartment, or the connector terminals.
⓫		IEC60417 No. 5002	Positioning of cell To identify the battery holder itself and to identify the positioning of the cell(s) inside the battery holder.
⓬		—	The same as No. 11.
⓭		IEC60417 No. 5019	Protective earth To identify any terminal which is intended for connection to an external conductor for protection against electric shock in case of a fault, or the terminal of a protective earth electrode.
⓮		IEC60417 No. 5017	Earth To identify an earth (ground) terminal in cases where neither the symbol No. 13 is explicitly required.

No.	Symbol mark	Approved standards	Description
⑮		IEC60417 No. 5032	Alternating current To indicate on the rating plate that the equipment is suitable for alternating current only; to identify relevant terminals.
⑯		IEC60417 No. 5031	Direct current To indicate on the rating plate that the equipment is suitable for direct current only; to identify relevant terminals.
⑰		IEC60417 No. 5172	Class II equipment To identify equipment meeting the safety requirements specified for Class II equipment according to IEC 61140.
⑱		ISO 3864	General prohibition To identify actions or operations that are prohibited.
⑲		ISO 3864	Contact prohibition To indicate injury that could occur due to touching a specific part of the equipment.
⑳		—	Never look into the optical lens while the projector is on.
㉑		—	To indicate that the marked item don't place anything on projector.
㉒		ISO3864 IEC60825-1	Caution, laser radiation To indicate the equipment has a laser radiation part.

No.	Symbol mark	Approved standards	Description
㉓		ISO 3864	Disassembly prohibition To indicate a risk of injury, such as electric shock, if the equipment is disassembled.
㉔		IEC60417 No. 5266	Standby, partial standby To indicate that part of the equipment is in the ready status.
㉕		ISO3864 IEC60417 No. 5057	Caution, movable parts To indicate that you must keep away from movable parts according to protection standards.
㉖		IEC60417 No. 6056	Caution (Moving Fan Blades) As a safety precaution, stay away from the moving fan blades.
㉗		IEC60417 No. 6043	Caution (Sharp Corners) To indicate sharp corners that should not be touched.
㉘		—	To indicate that looking into the lens while projecting is prohibited.
㉙		ISO7010 No. W027 ISO 3864	Warning, Optical radiation (such as UV, visible radiation, IR) Taking care to avoid injury to eyes and skin when in the vicinity of optical radiation.
㉚		IEC60417 No. 5109	Not to be used in residential areas. To identify electrical equipment which is not suitable for a residential area.

This product comes with warning labels.



As with any bright source, do not stare into the beam, RG2 IEC/EN 62471-5:2015.

This section briefly explains the difficult terms that are not explained in the text of this guide. For details, refer to other commercially available publications.

Aspect Ratio	The ratio between an image's length and its height. Screens with a horizontal:vertical ratio of 16:9, such as HDTV screens, are known as wide screens. SDTV and general computer displays have an aspect ratio of 4:3.
Contrast	The relative brightness of the light and dark areas of an image can be increased or decreased to make text and graphics stand out more clearly, or to make them appear softer. Adjusting this particular property of an image is called contrast adjustment.
DHCP	An abbreviation of Dynamic Host Configuration Protocol, this protocol automatically assigns an IP address to equipment connected to a network.
Full HD	A screen size standard with a resolution of 1,920 (horizontal) × 1,080 (vertical) dots.
Gateway Address	This is a server (router) for communicating across a network (subnet) divided according to subnet mask.
HDCP	HDCP is an abbreviation for High-bandwidth Digital Content Protection. It is used to prevent illegal copying and protect copyrights by encrypting digital signals sent over DVI and HDMI ports. Because the HDMI port on this projector supports HDCP, it can project digital images protected by HDCP technology. However, the projector may not be able to project images protected with updated or revised versions of HDCP encryption.
HDMI™	An abbreviation for High Definition Multimedia Interface. HDMI™ is a standard aimed at digital consumer electronics and computers. This is the standard by which HD images and multichannel audio signals are digitally transmitted. By not compressing the digital signal, the image can be transferred at the highest quality possible. It also provides an encryption function for the digital signal.
HDTV	An abbreviation for High-Definition Television that refers to high-definition systems which satisfy the following conditions: • Vertical resolution of 720p or 1080i or greater (p = Progressive, I = Interlace) • Screen aspect ratio of 16:9
Interlace	Transmits information needed to create one screen by sending every other line, starting from the top of the image and working down to the bottom. Images are more likely to flicker because one frame is displayed every other line.
IP Address	A number to identify a computer connected to a network.
Progressive	Projects information to create one screen at a time, displaying the image for one frame. Even though the number of scan lines is the same, the amount of flicker in images decreases because the volume of information has doubled compared with an interlace system.
Refresh Rate	The light-emitting element of a display maintains the same luminosity and color for an extremely short time. Because of this, the image must be scanned many times per second to refresh the light-emitting element. The number of refresh operations per second is called the Refresh rate and is expressed in hertz (Hz).
SDTV	An abbreviation for Standard Definition Television that refers to standard television systems which do not satisfy the conditions for HDTV High-Definition Television.
SSID	SSID is identification data for connecting to another device on a wireless LAN. Wireless communication is possible between devices with the same SSID.
Subnet Mask	This is a numerical value that defines the number of bits used for the network address on a divided network (subnet) from the IP address.

SVGA	A screen size standard with a resolution of 800 (horizontal) × 600 (vertical) dots.
SXGA	A screen size standard with a resolution of 1,280 (horizontal) × 1,024 (vertical) dots.
Sync.	The signals output from computers have a specific frequency. If the projector frequency does not match this frequency, the resulting images are not of a good quality. The process of matching the phases of these signals (the relative position of the crests and the troughs in the signal) is called Synchronization. If the signals are not synchronized, flickering, blurriness, and horizontal interference occur.
VGA	A screen size standard with a resolution of 640 (horizontal) × 480 (vertical) dots.
XGA	A screen size standard with a resolution of 1,024 (horizontal) × 768 (vertical) dots.
WXGA	A screen size standard with a resolution of 1,280 (horizontal) × 800 (vertical) dots.

FCC Compliance Statement

Supplier's DECLARATION of CONFORMITY
According to 47CFR, Part 2 and 15
Class B Personal Computers and Peripherals; and/or
CPU Boards and Power Supplies used with Class B Personal Computers

We: Epson America, Inc.

Located at: 3131 Katella Avenue, Los Alamitos, CA

Tel: 562-981-3840

Declare under sole responsibility that the product identified herein, complies with 47CFR Part 2 and 15 of the FCC rules as a Class B digital device. Each product marketed, is identical to the representative unit tested and found to be compliant with the standards. Records maintained continue to reflect the equipment being produced can be expected to be within the variation accepted, due to quantity production and testing on a statistical basis as required by 47CFR 2.906. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Trade Name: EPSON

Type of Product: LCD Projector

Model: HA84A/HA85A/HA86A

Other destination model: HA84B/HA85B/HA86B

FCC Compliance Statement For United States Users

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for

this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

Indication of the manufacturer and the importer in accordance with requirements of EU directive

Manufacturer: SEIKO EPSON CORPORATION
Address: 3-5, Owa 3-chome, Suwa-shi, Nagano-ken 392-8502 Japan
Telephone: 81-266-52-3131

Restriction of Use

When this product is used for applications requiring high reliability/safety such as transportation devices related to aviation, rail, marine, automotive etc.; disaster prevention devices; various safety devices etc; or functional/precision devices etc, you should use this product only after giving consideration to including fail-safes and redundancies into your design to maintain safety and total system reliability. Because this product was not intended for use in applications requiring extremely high reliability/safety such as aerospace equipment, main communication equipment, nuclear power control equipment, or medical equipment related to direct medical care etc, please make your own judgment on this product's suitability after a full evaluation.

How to Dispose of the Projector

The lamp in this product contains mercury (Hg). When you dispose of the projector at the end of a product's life, check your local laws and regulations regarding disposal or recycling. Do not put it in the trash with ordinary garbage.

Operating System References

- Microsoft® Windows® 8.1 operating system
- Microsoft® Windows® 10 operating system
- Microsoft® Windows® 11 operating system

In this guide, the operating systems above are referred to as "Windows 8.1", "Windows 10", and "Windows 11". Furthermore, the collective term "Windows" is used to refer to them all.

- macOS 10.13.x
- macOS 10.14.x
- macOS 10.15.x
- macOS 11.0.x
- macOS 12.0.x

In this guide, the collective term "Mac" is used to refer to all of the operating systems above.
