USB Printer Class Device Replacement Service

Version	Ver.2.3.0.0
Uploaded date	2024/6/13
File size	1.91MB

Explanation	This software provides service to change the output destination to another printer driver automatically without changing the setting of application and OS when the USB device of the same model is replaced.
	The feature of the function is as follows.
	- Detection of connected device.
	- Rewriting of property information of the printer driver registered in OS.
	
	- Automatic change of port at output destination.
