EpsonNet SetupManager Software

Version	Ver.2.2.17
Uploaded date	2023/11/09
File size	38,077KB
Explanation	EpsonNet SetupManager is a utility that provides a simple printer installation and configuration tool for network administrators, and an easy network printer installation process for client users. EpsonNet SetupManager installs the printer driver for printers newly connected to the network and helps network administrators and client users efficiently install and configure new network printers on Windows operating systems running TCP/IP. For installation of EpsonNet SetupManager, please refer to ReadmeE.txt in the attached software. **[Change Ver.2.2.15 to Ver.2.2.17]** **1.Note** 　　None **2.Software Outline** 　　EpsonNet SetupManager is a utility that automates the installing applications and setting up drivers by creating a file in which installing procedures of the printer driver and various applications are written. Reducing setup and installation on a client PC enables users to provide easy installation of the printer. **3.Environment** 　　**[Support OS]** 　　- Windows 11 　　- Windows 10 (32/64bit) 　　- Windows 8.1 (32/64bit) 　　- Windows 8 (32/64bit) 　　- Windows 7 SP1 (32/64bit) 　　- Windows Vista SP2 (32/64bit) 　　- Windows XP SP3 (32bit) 　　- Windows XP SP2 (64bit) 　　- Windows Server 2022 　　- Windows Server 2019 　　- Windows Server 2016 　　- Windows Server 2012 R2 　　- Windows Server 2012 　　- Windows Server 2008 SP2 　　- Windows Server 2008 R2 SP1 　　- Windows Server 2003 R2 SP2 **4.Changes from the Current Version** 　　**[Updated support model/OS]** 　　- EULA (End user license agreement) has been updated to the latest version. 　　**[Function change]** 　　- None
