■ Installation Specifications

Remote Control Operation (Wireless)

Make sure that you aim the remote control at the projector's receivers within the distance and angles listed here.

Installation Position

- Installation space

When installing the projector, make sure there is a gap between the wall and the projector's air exhaust and intake vents as shown in the following image.

- Installation space (When installing multiple projectors side by side)
- If you are installing multiple projectors next to each other, make sure hot air from the exhaust vent does not go into the air intake vent of another projector.

- If you use a partition, you can narrow the space between the projectors.

Projection Distance Formula

You can calculate the projection distance using the following formulas. You can see a more detailed projection simulation on our Web site.
<https://epson.com/>

- 1 Projection distance (cm)
- 2 Distance from the back of the projector to the screen (cm)
- 3 Distance from the projector to the bottom of the screen (cm)
- 4 Distance from the projector to the top of the screen (cm)
- 5 Distance from the center of the lens to the rear of the projector (cm)

<For screens with an aspect ratio of 16:9>

Projection distance (1) formula	
Minimum (Wide)	Projection distance (cm) = Projection screen size (inches) x 0.37435-2.13581
Maximum (Tele)	Projection distance (cm) = Projection screen size (inches) x 0.50538-2.13581

<For screens with an aspect ratio of 4:3>

Projection distance (1) formula	
Minimum (Wide)	Projection distance (cm) = Projection screen size (inches) x 0.45815-2.13581
Maximum (Tele)	Projection distance (cm) = Projection screen size (inches) x 0.6185-2.13581

<For screens with an aspect ratio of 16:10>

Projection distance (1) formula	
Minimum (Wide)	Projection distance (cm) = Projection screen size (inches) x 0.4047-2.13581
Maximum (Tele)	Projection distance (cm) = Projection screen size (inches) x 0.54634-2.13581

<For screens with an aspect ratio of 16:6>

Projection distance (1) formula	
Minimum (Wide)	Projection distance (cm) = Projection screen size (inches) x 0.40217-2.13581
Maximum (Tele)	Projection distance (cm) = Projection screen size (inches) x 0.54293-2.13581

<For screens with an aspect ratio of 21:9>

Projection distance (1) formula	
Minimum (Wide)	Projection distance (cm) = Projection screen size (inches) x 0.39479-2.13581
Maximum (Tele)	Projection distance (cm) = Projection screen size (inches) x 0.53296-2.13581

■ Monitoring and Control

You can check the status of networked projectors and perform various projector operations using these methods.

Method	Details
ESC/VP21 command	When the projector is connected to a computer with an RS-232C cable, you can control the projector with communication commands.
Epson Web Control	By using the Web browser of a computer connected to the projector on a network, you can set the projector's functions and control the projector.
PJLink command	The projector complies with the PJLink Class2 standard established by the JBMIA. From a computer connected to the projector on a network, you can control the projector with PJLink commands. For more details on PJLink, see the following Web site. http://pjlink.jbmia.or.jp/english/
Art-Net command	Art-Net is an Ethernet communication protocol based on the TCP/IP protocol. You can control the projector by using a DMX controller or an application system.
Epson Projector Management	Allows you to control multiple Epson projectors on a network. You can download Epson Projector Management from the following Web site. epson.sn/
Crestron Connected	If you are using the Crestron Connected network monitoring and control system, you can set up your projector for use on the system. For additional information on Crestron Connected, visit the Crestron Web site. https://www.crestron.com/products/line/crestron-connected
Web API	You can control the projector by Web API communication using API authentication (Digest authentication). For details, see the "Web API Specifications for Projectors" on the following website. https://support.epson.net/setupnavi/
